2025 U.N. SDGS

The Sustainable Development Goals (SDGs) were adopted by the United Nations in 2015 to end poverty, protect the planet, and improve the quality of life for all people by 2030. This globally agreed-upon framework offers industries a shared language for tracking progress towards a more sustainable and inclusive future. Once Upon a Farm uses relevant SDGs to help us track, monitor and report on ESG progress, and these goals help inform our 2025 Impact Report.

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
	End hunger, achieve food security and improved nutrition and promote sustainable agriculture	By 2030, end hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round	2.1	Once Upon a Farm has set a goal to provide products at a lower opening price to increase accessibility subject to availability. Philanthropic donations through Save the Children and policy advocacy are additional ways that Once Upon a Farm strives to end hunger and improve nutrition. In 2025, Once Upon a Farm surpassed its goal to donate A Million Meals in partnership with Save the Children, ultimately donating over 1,227,000 meals to children in food insecure communities across the United States. Once Upon a Farm has a specific product line authorized by the Special Supplemental Nutrition Program for Women Infants and Children (WIC). At the end of 2025, Once Upon a Farm's WIC-approved products were authorized in 28 states. Once Upon a Farm is seeking further expansion of this approval in more states to increase nutrition access of convenient fresh and organic foods to pregnant and postpartum mothers, babies, and children under five. In 2025, Once Upon a Farm expanded its value-oriented multi-pack offerings in club stores, helping make its fresh, organic blends available to families at a price point 40% below the lowest opening price point for single serving pouches available at retail. SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
 (CONT.)	End hunger, achieve food security and improved nutrition and promote sustainable agriculture	By 2030, end hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round	2.1	(Continued from previous page.) Following crises like the 2025 LA fires, and the multiple government shutdowns, Once Upon a Farm donated its products to help address short-term gaps for communities in need of immediate food assistance.	2025 Impact Report Pages 10-15: Empowering Healthy Communities

2025 U.N. SDGS

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
	End hunger, achieve food security and improved nutrition and promote sustainable agriculture	By 2030, ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality.	2.4	Once Upon a Farm sources all organic ingredients; organic standards require that farmers protect natural resources when stewarding their land, which positions organic farms as key players in climate adaptation. Organic agriculture builds soil health and helps keep toxic and persistent pesticides out of watersheds. In 2022, Once Upon a Farm conducted its first Life Cycle Analysis (LCA) to better understand the environmental impacts of its primary products — organic, cold-pressed fruit and veggie pouches. This information continues to inform the company's priorities as it conducts additional baselining and goal setting work. For example, Once Upon a Farm's LCA findings highlighted water and ecosystems as hotspots at the ingredient-level, so the company is taking efforts at the innovation and product development stage to source climate-smart ingredients. One example of this initiative in action was the sourcing of climate-smart sorghum for its Fruit & Veggie Puffs, which launched in 2023. More recently, Once Upon a Farm launched the Pine-Apple Guava Belly Blend in 2025, sourcing climate-smart guava to maintain nutritional value in changing climates. (The company defines "climate-smart ingredients" as those with positive environmental attributes, such as heat- or drought-tolerance; adaptability and hardiness against changing climate patterns; perennials, which minimize soil disturbance, and more.)	2025 Impact Report Pages 17-24: Farming for People & Planet

2025 U.N. SDGS

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
	Ensure sustainable consumption and production patterns	By 2030, achieve the sustainable management and efficient use of natural resources	12.2	Once Upon a Farm has completed its greenhouse gas inventory for Scope 1, 2, and 3 emissions for 2023, 2024, and 2025. Additionally, the company has purchased Green-e certified Renewable Energy Certificates (RECs) equivalent to the energy required to manufacture its products each year since 2021, enabling the company to contribute to new and existing renewable energy markets. Since 2022, Once Upon a Farm has completed an annual inventory of consumer unit packaging, enabling the company to track material volumes year-over-year, with an eye on strategies for reduction and a valuable resource for complying with emerging Extended Producer Responsibility (EPR) laws. In 2025, Once Upon a Farm completed EPR reporting in Oregon, Colorado, and California. (Continued on next page.)	2025 Impact Report Pages 26-29: Reducing Our Impact

2025 U.N. SDGS

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
 (CONT.)	Ensure sustainable consumption and production patterns	By 2030, achieve the sustainable management and efficient use of natural resources	12.2	(Continued from previous page.) In 2024, Once Upon a Farm redesigned its pouches to use 20% less plastic than its previous pouch. This pouch also uses a simpler, all-PE (polyethylene) material designed for future recycling. While the pouch is not yet recyclable at scale, this is one important step towards circularity and future recycling. The new pouch design helped reduce CO2e emissions by 13% per pouch according to a 2025 update to the company's initial 2022 LCA. Once Upon a Farm also participates in the voluntary How2Recycle (H2R) labeling program to help take the guesswork out of recycling and help make sure materials end up in the right waste streams.	2025 Impact Report Pages 26-29: Reducing Our Impact

2025 U.N. SDGS

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
	Take urgent action to combat climate change and its impacts	Integrate climate change measures into national policies, strategies and planning	13.2	Once Upon a Farm's Life Cycle Analysis (LCA) conducted in 2022 provided the company with a baseline understanding of carbon, ecosystem, water and packaging impacts. The company has completed its greenhouse gas inventory for Scope 1, 2, and 3 emissions for three consecutive years and is continuing to measure emissions and glean insights to inform future strategy. In 2023, Once Upon a Farm established a sustainability steering committee including executive leadership to provide oversight of the company's evolving sustainability strategy and align on key targets and roadmaps. In 2025, Once Upon a Farm moved its Sustainability team under Operations, tying it directly to its Strategic Sourcing function. This best positions the department to address climate-related risks, impacts, and opportunities in the company's business, and gain operational efficiencies in service of the company's greater purpose of driving systemic improvements for a healthier, happier, more equitable world. As a Public Benefit Corporation and Certified B Corporation, Once Upon a Farm is committed to using business as a force for good, integrating both social and environmental considerations into its purpose as a for-profit business. Once Upon a Farm recently recertified as a B Corp in 2025 and intends to recertify as a Certified B Corp in 2027 per the updated B Corp standards.	2025 Impact Report Pages 26-29: Reducing Our Impact

2025 U.N. SDGS

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
	Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt/ reverse land degradation and halt biodiversity loss	By 2030, combat desertification, restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land degradation-neutral world	15.3	Once Upon a Farm sources all organic ingredients; organic regenerates soil and is capable of conserving water, as soil with higher organic matter retains more water. Organic standards require crop rotation which helps to build soil and promote biodiversity, making organic systems more resilient to droughts, floods, and other environmental stresses over the long term.	2025 Impact Report Pages 17-24: Farming for People & Planet Pages 26-29: Reducing Our Impact

2025 U.N. SDGS

SDG	GOAL	TARGET	NO.	O'FARM INITIATIVES	REFERENCES
	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels	Develop effective, accountable and transparent institutions at all levels	16.6	As a Certified B Corp and Public Benefit Corporation, Once Upon a Farm is held accountable to its commitments to business ethics, transparent management, and building an inclusive place to work. The company recertified its B Corp status in 2025, achieving a higher score than in 2022, and plans to recertify again in 2027 under the new standards.	2025 Impact Report Page 31: Governance
	Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development	Encourage and promote effective public, public-private and civil society partnerships, building on the experience and resourcing strategies of partnerships	17.17	Once Upon a Farm is an active member in many groups that facilitate public-private partnerships to advance childhood nutrition, organic and sustainable agriculture, and improve packaging sustainability and waste streams via membership in the Clean Label Project, Organic Trade Association, Sustainable Packaging Coalition, and How2Recycle.	2025 Impact Report Pages 10-15: Empowering Healthy Communities

Forward-looking Statements

This report (“Report”) was published in August 2026. The data and information in this Impact Report (“Report”), which has been prepared by Once Upon a Farm, PBC (“Once Upon a Farm”) are presented for informational purposes only. Except where specifically noted otherwise, the reporting period of the Report covers subject matter and data for Once Upon a Farm from January 1 - December 31, 2025.

Statements in this Report that relate to future events, expectations, and trends may be considered ”forward-looking statements” and involve factors that are subject to change and risks and uncertainties that could cause actual results to differ materially. These risks and uncertainties are difficult to predict and often are outside of our control. We have attempted to identify forward-looking statements by words such as “may,” ”could,” “anticipate,” “target,” “plan,” ”continue,” “goal,” ”commit,” ”achieve,” ”project,” ”intend,” ”estimate,” ”believe,” ”may,” ”potential,” ”predict,” ”expect,” or other similar terminology. However, such terminology is not the exclusive means of identifying forward-looking statements, and its absence does not mean that a statement is not forward-looking. You should not place undue reliance on forward-looking statements, which are neither historical facts nor assurances of future performance. Instead, they are based only on Once Upon a Farm’s current beliefs, expectations, and assumptions regarding the future of its business and anticipated changes and trends. Although Once Upon a Farm believes the beliefs, expectations, and assumptions reflected in the forward-looking statements are reasonable, any forward-looking statement speaks only as of the date on which that statement is made. Once Upon a Farm assumes no obligation to update any forward-looking statement to reflect events or circumstances that occur after the date on which the statement is made.

In addition, statistics and metrics presented in this Report relating to sustainability matters are estimates and may be based on assumptions or developing standards. Additionally, terms such as “sustainable,” “recyclable,” or “nutritious” can be subjective in nature, and there is no representation or guarantee that these terms, as used by Once Upon a Farm, will reflect the views, policies, principles, frameworks or preferred practices of any particular third-party or reflect market trends.

The information contained herein is only as current as the date indicated and may be superseded by subsequent market events or for other reasons. Once Upon a Farm is not under any obligation to update or keep current the information contained herein.

The inclusion of information in this report should not be construed as a characterization regarding the materiality or financial impact of that information.

Certain goals, targets, intentions, or expectations described herein are voluntary and should be viewed as aspirational. Further, certain information contained herein relating to any goals, targets, intentions, or expectations is subject to change, and no assurance can be given that such goals, targets, intentions, or expectations will be met within applicable time frames or at all.

Similarly, there can be no assurance that our sustainability policies and procedures as described in this Report will continue; and such policies and procedures could change, even materially. We are permitted to determine in our discretion that it is not feasible or practical to implement or complete certain of our sustainability initiatives, policies, and procedures based on cost, timing, or other considerations.

For example, our objectives with respect to GHG emissions and product packaging are voluntary, subject to change, and should be considered aspirational. Further, these objectives are subject to change in the event of significant or structural changes in Once Upon a Farm (including acquisitions, divestiture, mergers, insourcing or outsourcing), key performance indicator methodology changes, or changes in data reported due to improved calculation methodologies or better data accessibility.

In gathering and reporting upon the sustainability information contained herein, Once Upon a Farm may depend on data, analysis, or recommendations provided by third-party advisors or data sources, which may be incomplete, inaccurate, or out of date. Figures included in this document have not been audited, assured, or independently verified by auditors or third-party assurance providers.

Once Upon a Farm does not independently verify all sustainability information it receives from third-party advisors or data sources, and it may decide in its discretion not to use certain information or accept certain recommendations. Once Upon a Farm makes no representation or warranty, express or implied, with respect to the accuracy, fairness, reasonableness, fitness for use, or completeness of any of the information contained herein, and expressly disclaims any responsibility or liability therefore.

This report may contain links and references to other Internet sites. Such links or references are not endorsements of any products or services in such sites, and no information in such site has been endorsed or approved by the company.

References to case studies in this report are intended to be illustrative only and are not intended to be used as an indication of the current or future performance. The inclusion of any third-party firm and/or company names, brands, and/or logos does not imply any affiliation with these firms or companies. None of these firms or companies have endorsed Once Upon a Farm.

There is no guarantee that Once Upon a Farm will remain a signatory, supporter, or member of any sustainability initiatives or other similar industry frameworks.
