Clearfield® SeeChange™ Helps Operators Speed Fiber Deployments as FTTx and 5G Networks Ramp

Innovative carrier-grade access terminal is sealed, hardened, and scalable, ideal for any deployment scenario throughout the Outside Plant

MINNEAPOLIS--(BUSINESS WIRE)-- [Clearfield, Inc.](#) (NASDAQ:CLFD), the leader in community broadband fiber connectivity, today announced the [SeeChange™ Terminal and hardened connector system](#). The small, craft-friendly, carrier-grade, access terminal is ideal for any fiber network deployment requiring a plug-and-play approach. Purpose-built as a commercially-off-the-shelf option for community broadband and 5G network operators looking to overcome industry-wide supply chain constraints and a shortage of skilled technicians, this readily available, plug-and-play terminal and hardened connector system is a cost-effective, pre-packaged solution that requires minimal training in any deployment scenario, tested to withstand even the most extreme environments.

“I could author a book on fixed wireless technologies, but I know nothing about fiber. By teaming up with Clearfield and its new SeeChange platform, I can deliver a state-of-the-art fiber-to-the-home network to over 200 homes in Lubbock, TX, using plug-and-play components with only my two wireless techs,” said Rob Walker, Owner, Telespan. “Anyone wanting an easy to understand and easy to install fiber network should consider the Clearfield SeeChange platform.”

SeeChange hardened fiber assemblies are available with either a multi-fiber MPO connector or a single-fiber SC APC connector. An integrated rear shell provides the feature that engages and fully seals a connection to the SeeChange Terminal. The connection is ideal for harsh OSP environments and is rated for installations below grade or above grade including aerial installations on strands. An MPO input port allows for four subscriber drop ports as well as an MPO Express output port that feeds downstream terminals, enabling the operator to push fiber deeper in the neighborhood. The compact size can be deployed in a variety of locations including pedestal, vault, flowerpot, pole-mount, smart-pole, or strand mounted options.

“Over the next decade, fiber networks will go further than they have ever gone before, connecting people and places previously unreachable based on economics and technology. Operators need solutions that speed time to market, reduce cost of deployment, and can be deployed with minimal training,” said Johnny Hill, Chief Operating Officer of Clearfield. “SeeChange ensures that our customers can address these needs quickly and cost effectively, with a simplified solution that withstands the harshest environmental challenges.”

SeeChange works alongside Clearfield’s other terminal products designed so that engineers can deliver fiber services in support of any size fiber-to-the-home (FTTH), fiber-to-the-business (FTTB), or 5G network, with minimal training needed for installation and service

activation. Both hardened connector styles are easily secured into open terminal ports and cleaned and inspected using a special optical probe tip, making it a complete solution for quick installations using entry level technicians.

More information on Clearfield's SeeChange™ is available in the [terminal](#) and [hardened fiber assemblies](#) data sheets, the [SeeChange Access Terminal and Hardened Connector System](#) video and at www.SeeClearfield.com.

About Clearfield, Inc.

Clearfield, Inc. (NASDAQ: CLFD) designs, manufactures, and distributes fiber optic management, protection, and delivery products for communications networks. Our “fiber to anywhere” platform serves the unique requirements of leading incumbent local exchange carriers (traditional carriers), competitive local exchange carriers (alternative carriers), and MSO/cable TV companies, while also catering to the broadband needs of the utility/municipality, enterprise, data center and military markets. Headquartered in Minneapolis, MN, Clearfield deploys more than a million fiber ports each year. For more information, visit www.SeeClearfield.com.
