Ondas Receives Order from Major Defense Company for Integration of New Applications to its AI-Driven Iron Drone Raider System

The purchase order includes integration and testing of new features and capabilities for protecting against additional ground threats, expected to further increase total addressable market (TAM)

Ondas will continue expanding the applications of its unique AI-integrated drone platform, making it relevant to additional applications in the Defense and Homeland Security markets

BOSTON, MA / ACCESSWIRE / January 8, 2025 /[Ondas Holdings Inc.](#) (NASDAQ:ONDS) ("Ondas" or the "Company"), a leading provider of private industrial wireless networks and commercial drone and automated data solutions, announced today that its Ondas Autonomous Systems Inc. ("OAS") business unit's Airobotics subsidiary has received a purchase order for its Iron Drone Raider from a major defense company. The order includes the integration and testing of new features required for defending from additional ground threats.

"The Iron Drone Raider is a high performing, modular platform with AI-driven navigation and operating capabilities tailored to the most demanding defense requirements," said Eric Brock, Chairman and CEO of Ondas. "Indeed, this versatility is allowing for expanded applications further expanding the potential market size for our Iron Drone platform. These new use cases meet an additional need identified by a governmental customer with the required performance and cost parameters. Securing this platform expansion highlights the exceptional talent and experience of our Airobotics team and the confidence our defense partners and customers have in Ondas."

During the third quarter of 2024, OAS secured several initial orders in the defense market, totaling approximately \$14.4 million, which included several purchase orders totaling \$9.0 million from a major government military customer for the Iron Drone Raider system. The Iron Drone Raider systems are being deployed as a core element of a multi-layered homeland security infrastructure to protect critical locations, assets and populations from the threat of hostile drones.

Ondas expects to secure additional orders, including from new customers and distribution partners, to support its drone systems and infrastructure expansion over the next twelve months.

About Ondas Holdings Inc

Ondas Holdings Inc. ("Ondas") is a leading provider of private wireless data solutions via Ondas Networks Inc. ("Ondas Networks") and commercial drone solutions through Ondas Autonomous Systems Inc. via its wholly owned subsidiaries American Robotics, Inc. ("American Robotics" or "AR") and Airobotics LTD ("Airobotics"), which we operate as a separate business unit called Ondas Autonomous Systems.

Ondas Networks is a developer of proprietary, software-based wireless broadband technology for large established and emerging commercial and government markets. Ondas Networks' standards-based (802.16s), multi-patented, software-defined radio FullMAX platform enables Mission-Critical IoT (MC-IoT) applications by overcoming the bandwidth limitations of today's legacy private licensed wireless networks. Ondas Networks' customer end markets include railroads, utilities, oil and gas, transportation, aviation (including drone operators) and government entities whose demands span a wide range of mission critical applications.

Ondas Autonomous Systems Inc. (OAS) specializes in designing, developing, and marketing autonomous drone solutions via its two advanced drone platforms: the Optimus System, the world's first FAA-certified small UAS (sUAS) for aerial security and data capture, and the Iron Drone Raider, a counter-drone system designed to combat hostile drones. Both platforms are highly automated, AI-powered, and capable of continuous, remote operation for critical defense, infrastructure, industrial, and government applications. American Robotics and Airobotics have achieved industry-leading regulatory milestones, including the first-ever FAA Type Certification for the Optimus System and the first drone system approved by the FAA for automated beyond-visual-line-of-sight (BVLOS) operations without an on-site human operator. Ondas Networks, American Robotics and Airobotics together provide users in defense, homeland security, public safety and other critical industrial and government security and infrastructure markets with improved connectivity, situational awareness and data collection and information processing capabilities.
