Total IRR Across All Unrealized Investments Shown Above **9.6%**

NMFC – Asset by Asset Returns

(FIGURES HEREIN ARE UNAUDITED)

Total Gross and Net IRR across all realized and unrealized investments shown in preceding slides		
	Levered	Unlevered
Gross IRR*	24.6%	15.0%
Net IRR*	17.1%	10.9%

* Please refer to page 10 for full definition of “Gross IRR” (endnote #2) and “Net IRR” (endnote #11) and additional disclaimers around portfolio track record data. Gross IRR (levered and unlevered) does not reflect the effect of management and incentive fees or other expenses. Net IRR presented reflects the composite performance of the pre-IPO and NMFC credit portfolios. The pre-IPO credit portfolio represents the period from October 2008 through May 18, 2011 (and includes the application of a 1.75%/20% management fee and carry fee arrangement, in line with the structure outlined in New Mountain’s Fund III LPA), and the NMFC credit portfolio represents the period from May 19, 2011 (the date of the initial public offering) through March 31, 2017 (and includes the application of a base management fee of 1.75% including waivers granted by the Investment Adviser of applicable fees as discussed in NMFC’s public filings and an annualized incentive fee of 20.0%). Net Levered IRR is calculated based on the cash flows resulting from capital contributions/primary equity offerings and capital distributions/dividends. Net Levered IRR reflects all management fees, incentive fees, interest and other financing expenses and other expenses (including professional fees, administration costs and tax related fees). Net Unlevered IRR is calculated based on the cash flows resulting from capital contributions/primary equity offerings, capital distributions/dividends and financing proceeds/repayments. Net Unlevered IRR reflects all management fees, incentive fees and other expenses (including professional fees, administration costs and tax related fees).

Note: Past performance is not indicative of future results. For additional disclaimers and endnotes, please refer to page 10 of this document.

Disclaimer:

For Informational Purposes Only

Please note that the information and figures presented herein are unaudited and are based on certain estimates and assumptions. New Mountain Finance Corporation ("NMFC") makes no representation or warranty, expressed or implied, with respect to the accuracy, reasonableness, or completeness of any of the information contained herein, including, but not limited to, information obtained from third parties. The information contained herein is intended to be considered in the context of NMFC's Securities and Exchange Commission ("SEC") filings and other public announcements that NMFC may make, by press release or otherwise, from time to time. NMFC undertakes no duty or obligation to publicly update or revise the information contained herein unless required by law. In addition, information related to past performance, while helpful as an evaluative tool, is not necessarily indicative of future results, the achievement of which cannot be assured. You should not view the past performance of NMFC, or information about the market, as indicative of NMFC's future results. The performance data stated herein may have been due to extraordinary market conditions, which may not be duplicated in the future. Current performance may be lower or higher than the performance data quoted. Furthermore, this information is not indicative of the performance of any other portfolio/client account managed by NMFC's investment adviser (or, if at portfolio company level, no guarantee that a portfolio company of another account will experience similar returns). This does not constitute an offer to sell or the solicitation of an offer to buy any securities of NMFC. The financial metrics herein are not in accordance with accounting principals generally accepted in the United States ("GAAP"). NMFC's management uses this information in its internal analysis of results and believes that this information may be informative to investors in gauging the quality of NMFC's financial performance, identifying trends in NMFC's results and providing meaningful period-to-period comparisons. The information contained herein is not intended to provide, and should not be relied upon for, accounting, legal or tax advice or investment recommendations.

Gross Internal Rate of Return ("Gross IRR") reflects historical results relating to NMFC's past performance and is not necessarily indicative of its future results. In addition, gross IRR does not reflect the effect of management fees, expenses, incentive fees or taxes borne, or to be borne, by NMFC or its stockholders, and it would be lower if it did. Pursuant to the Investment Advisory and Management Agreement, NMFC pays its investment adviser a base management fee of 1.75% and an annualized incentive fee of 20.00%.

Endnotes:

- (1) Amounts purchased / committed reflect initial commitment amounts for revolver investments and cash invested for all other investments.
- (2) Internal rate of return (or "IRR") is a measure of discounted cash flows (inflows and outflows). Specifically, IRR is the discount rate at which the net present value of all cash flows is equal to zero. That is, IRR is the discount rate at which the present value of total capital invested in the investments is equal to the present value of all realized returns from the investments. The IRR calculations presented are unaudited. Gross IRR is calculated as the IRR of actual cash flows resulting from purchase of assets, receipt of interest income, receipt and payment of other fees earned and expensed over the holding period, and proceeds from sales or repayments. For unrealized investments, cash flows include the assets' terminal values defined as the fair market values of the assets at March 31, 2017 plus any accrued interest income and fees earned as of March 31, 2017. Gross IRR calculation uses the dates of when cash is received for each cash transaction and excludes the timing impact of any proceeds held in escrow. "N/M" ("not meaningful") indicates assets that are either revolvers, delayed draw instruments, bridge loans, debtor-in-possession facilities, or treasuries (purchased by NMFC solely for Qualified Institutional Buyer certification status).
- (3) Multiple of invested capital (or "MIC") is a ratio of the amount of cash dollars returned from the investment compared to the amount of total invested capital. "Gross MIC" (or "Gross Multiple of Invested Capital") is defined as the total cash received during the hold period of an asset excluding cash transactions related to the original or follow-on purchases of the investment divided by the total cash transactions related to the original or follow-on purchases of the asset. "N/M" ("not meaningful") indicates assets that are either revolvers, delayed draw instruments, bridge loans, debtor-in-possession facilities, or treasuries (purchased by NMFC solely for Qualified Institutional Buyer certification status).
- (4) Other assets include delayed draw instruments, bridge loans, or treasuries (purchased by NMFC solely for Qualified Institutional Buyer certification status).
- (5) Treasuries were purchased by NMFC solely for Qualified Institutional Buyer certification status and were previously publicly disclosed under cash and cash equivalents.
- (6) Includes realized pre-restructured investments resulting from material modifications in UniTek Global Services, Inc. and the corresponding unrealized post-restructuring investments.
- (7) Includes realized pre-restructured investments resulting from material modifications in Edmentum, Inc. and the corresponding unrealized post-restructuring investments.
- (8) Includes unrealized, post-restructuring first lien term loan investment positions in ATI Acquisition Company and unrealized preferred equity investment position in Ancora Acquisition LLC.
- (9) Includes realized, pre-restructured investments resulting from material modifications in Permian Holdings, Inc. and the corresponding unrealized post-restructuring investments.
- (10) Includes unrealized, post-restructuring first lien term loan, preferred equity and common equity investment positions in Education Management Corporation and Education Management II LLC.
- (11) Net IRR presented reflects the composite performance of the pre-IPO and NMFC credit portfolios. The pre-IPO credit portfolio represents the period from October 2008 through May 18, 2011 (and includes the application of a 1.75%/20% management fee and carry fee arrangement, in line with the structure outlined in New Mountain's Fund III LPA), and the NMFC credit portfolio represents the period from May 19, 2011 (the date of the initial public offering) through March 31, 2017 (and includes the application of a base management fee of 1.75% including waivers granted by the Investment Adviser of applicable fees as discussed in NMFC's public filings and an annualized incentive fee of 20.0%). Net Levered IRR is calculated based on the cash flows resulting from capital contributions/primary equity offerings and capital distributions/dividends. Net Levered IRR reflects all management fees, incentive fees, interest and other financing expenses and other expenses (including professional fees, administration costs and tax related fees). Net Unlevered IRR is calculated based on the cash flows resulting from capital contributions/primary equity offerings, capital distributions/dividends and financing proceeds/repayments. Net Unlevered IRR reflects all management fees, incentive fees and other expenses (including professional fees, administration costs and tax related fees).
