

Company Overview

DRONE Aviation Corp (DRNE) designs, develops, markets and sells specialized tethered aerial monitoring and communications platforms serving national defense and security customers for use in applications including intelligence, surveillance and reconnaissance ("ISR") and communications.

Our products are designed for military and security applications where they can provide secure and reliable aerial monitoring for extended durations while being tethered to the ground via a high strength armored tether.

We focus primarily on the development of a tethered aerostat known as the Winch Aerostat Small Platform ("WASP") which has been purchased by tier-one customers including the U.S. Department of Defense and the Department of Homeland Security.
