CohBar Founder Dr. Nir Barzilai's New Book "AGE LATER" Reveals that Aging Can Be Seen as a Preventable Disease

MENLO PARK, Calif., June 17, 2020 (GLOBE NEWSWIRE) -- CohBar, Inc. (NASDAQ: CWBR), a clinical stage biotechnology company developing mitochondria based therapeutics to treat chronic diseases and extend healthy lifespan, today announced the publication of "AGE LATER: Health Span, Life Span, and the New Science of Longevity," authored by CohBar founder Nir Barzilai, M.D. Dr. Barzilai is the Founding Director of the Institute for Aging Research at the Albert Einstein College of Medicine and Scientific Director of the American Federation for Aging Research (AFAR). His studies on SuperAgers, a group of 750 centenarians, has shown that we can reframe aging as a phenomenon that can be treated like other diseases. These individuals maintain active lives well into their nineties and most do not experience the chronic diseases typically associated with aging. In his new book, Dr. Barzilai shares his quest to increase health span and life span.

"Dr. Barzilai's groundbreaking work is part of the antidote to the myths and confusion about longevity and what it takes to have a healthy lifespan," stated Steven Engle, CohBar's CEO. "Based on his decades of work, he has re-written the medical books and has provided pointers to living a healthier life. Nir and his team have discovered ways to help mimic the longer-term health of the SuperAgers, even if we do not have their genetic makeup. In addition, as one of CohBar's founders along with Dr. Hassy Cohen, Dr. David Sinclair and Dr. John Amatruda, Nir has been a key scientist in the discovery of mitochondrial peptide science, which we are using at CohBar to generate therapeutic candidates. CohBar's birth is chronicled in AGE LATER."

Dr. Barzilai is regarded as being one of the foremost authorities in the science of aging. He is a sought-after speaker on longevity and an advisor to physicians, researchers, and governments around the world.

About CohBar

CohBar (NASDAQ: CWBR) is a clinical stage biotechnology company focused on the research and development of mitochondria based therapeutics, an emerging class of drugs for the treatment of chronic and age-related diseases. Mitochondria based therapeutics originate from the discovery by CohBar's founders of a novel group of naturally occurring mitochondrial-derived peptides within the mitochondrial genome that regulate metabolism and cell death, and whose biological activity declines with age. To date, the company has discovered more than 100 mitochondrial derived peptides and generated over 1,000 analogs. CohBar's efforts focus on the development of these peptides into therapeutics that offer the potential to address a broad range of diseases, including nonalcoholic steatohepatitis (NASH), obesity, fibrotic diseases, cancer, acute respiratory distress

syndrome (ARDS), type 2 diabetes, and cardiovascular and neurodegenerative diseases. The company's lead compound, CB4211, is in the Phase 1b stage of a Phase 1a/1b clinical trial for NASH and obesity. This clinical trial is currently paused due to the COVID-19 pandemic. In addition, CohBar has four preclinical programs, two in cancer, one in fibrotic diseases and one in COVID-19 associated ARDS and type 2 diabetes.

Forward-Looking Statements

This news release contains forward-looking statements which are not historical facts within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and other future conditions. In some cases you can identify these statements by forward-looking words such as "believe," "may," "will," "estimate," "continue," "anticipate," "intend," "could," "should," "would," "project," "plan," "expect," "goal," "seek," "future," "likely" or the negative or plural of these words or similar expressions. Examples of such forward-looking statements include but are not limited to statements regarding anticipated outcomes of research and clinical trials for our mitochondria based therapeutic (MBT) candidates; expectations regarding the growth of MBTs as a significant future class of drug products; and statements regarding anticipated therapeutic properties and potential of our mitochondrial peptide analogs, MBTs and other potential therapies. You are cautioned that such statements are not guarantees of future performance and that actual results or developments may differ materially from those set forth in these forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include: our ability to successfully advance drug discovery and development programs, including the delay or termination of ongoing clinical trials; our possible inability to mitigate the prevalence and/or persistence of the injection site reactions, receipt of unfavorable feedback from regulators regarding the safety or tolerability of CB4211 or the possibility of other developments affecting the viability of CB4211 as a clinical candidate or its commercial potential; results that are different from earlier data results including less favorable than and that may not support further clinical development; our ability to raise additional capital when necessary to continue our operations; our ability to recruit and retain key management and scientific personnel; the risk that our intellectual property may not be adequately protected; our ability to establish and maintain partnerships with corporate and industry partners; and risks related to the impact on our business of the COVID-19 pandemic or similar public health crises. Additional assumptions, risks and uncertainties are described in detail in our registration statements, reports and other filings with the Securities and Exchange Commission and applicable Canadian securities regulators, which are available on our website, and at www.sec.gov or www.sedar.com.

You are cautioned that such statements are not guarantees of future performance and that our actual results may differ materially from those set forth in the forward-looking statements. The forward-looking statements and other information contained in this news release are made as of the date hereof and CohBar does not undertake any obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws. Nothing herein shall constitute an offer to sell or the solicitation of an offer to buy any

securities.
