Non-GAAP Financial Measures and Reconciliation

Adjusted Net Revenues and Adjusted EBITDA should be considered in addition to, not as a substitute for, or superior to, financial measures calculated in accordance with Generally Accepted Accounting Principles in the United States ("GAAP"). It is not a measurement of our financial performance under GAAP and should not be considered as an alternative to net revenues or net income (loss), as applicable, or any other performance measures derived in accordance with GAAP and may not be comparable to other similarly titled measures of other businesses. Adjusted Net Revenues and Adjusted EBITDA have limitations as

analytical tools and should not be considered in isolation or as a substitute for analysis of our operating results as reported under GAAP. Some of these limitations include: (i) Non-cash compensation is and will remain a key element of our overall long-term incentive compensation package, although we exclude it as an expense when evaluating its ongoing operating performance for a particular period, (ii) Adjusted Net Revenues and Adjusted EBITDA do not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of ongoing operations, and (iii) other companies in our industry may calculate Adjusted Net Revenues or Adjusted EBITDA differently than we do, limiting their usefulness as comparative measures.

We compensate for these limitations to Adjusted Net Revenues and Adjusted EBITDA by relying primarily on its GAAP results and using Adjusted Net Revenues and Adjusted EBITDA only for supplemental purposes. Adjusted Net Revenues and Adjusted EBITDA include adjustments for items that may not occur in future periods. However, we believe these adjustments are appropriate because the amounts recognized can vary significantly from period to period, do not directly relate to the ongoing operations of our business and complicate comparisons of our internal operating results and operating results of other peer companies over time. Each of the normal recurring adjustments and other adjustments described in this paragraph help management with a measure of our operating performance over time by removing items that are not related to day-to-day operations or are non-cash expenses.
