PowerFleet Reports Fourth Quarter and Full Year 2019 Financial Results

Quarterly GAAP Revenue Totaled Record \$35.1M, Up 17% Year-over-Year on a Pro Forma Basis

WOODCLIFF LAKE, N.J., March 12, 2020 (GLOBE NEWSWIRE) -- [PowerFleet, Inc.](#) (**Nasdaq: PWFL**), a global leader and provider of subscription-based wireless IoT and M2M solutions for securing, controlling, tracking, and managing high-value enterprise assets, reported results for the fourth quarter and full year ended December 31, 2019.

Management Commentary

“The fourth quarter was a strong finish to a transformational year for PowerFleet,” said CEO Chris Wolfe. “As our results for the quarter demonstrated, we are beginning to recognize the material financial benefits as well as operational efficiencies and deal flow as a larger organization. This was highlighted by the record \$35.1 million in total revenue, which was up 17% year-over-year on a pro forma basis, driven by solid contribution in high-margin recurring solutions and services revenue. We ended the quarter with approximately 550,000 mobile subscription units on our platform, putting us on track to meet our target of at least 600,000 mobile subscriber units by the end of 2020.

“Our powerful portfolio of solutions spanning the industrial, logistics and commercial vehicle industries continues to differentiate PowerFleet in the market. The best companies in the world continue to choose our mobility platforms and full end-to-end solutions to power their asset and fleet monitoring and management needs, and this was again validated in the fourth quarter. We secured several major new wins with leading transportation companies in our logistics business and had similar success in our industrial business, highlighted by multiple wins through our dealer channel. Our sales through Jungheinrich continue to build momentum, as we are seeing an increasing volume of orders secured in Europe. In our connected car business, we continued to execute on our program with Avis Budget Group and are in the process of bringing Pointer’s products into the U.S. to pursue the class 1 through class 5 fleet management market.

“Along that line, the integration of Pointer is proceeding rapidly, with several milestones achieved in the first six months post-close, including the consolidation of our strategic and tactical plans and product roadmaps. The alignment of our sales and go-to-market motions are yielding early success, validating one of the core theses for the business combination. In addition to our growth and cross-selling initiatives, we’ve already eliminated duplicative corporate costs and have identified more than \$3 million in supply chain savings that we expect to realize in 2020 as well as incremental cost savings expected in 2021 related to the platform consolidation currently underway.

“Today, we are a much stronger business with greater scale and resources, an industry-leading end-to-end IoT platform, significant cross-selling opportunities, and robust secular tailwinds working in our favor. Longer term, our vision of creating PowerFleet as a global IoT

software and solutions provider is progressing, which we believe will generate significant shareholder value through global operational and financial scale, sustainable profitability and cash flow generation.”

Non-GAAP Financial Measures

To supplement its financial statements presented in accordance with Generally Accepted

Accounting Principles (GAAP), PowerFleet provides certain non-GAAP measures of financial performance. These non-GAAP measures include adjusted EBITDA and adjusted EBITDA per basic and diluted share. Reference to these non-GAAP measures should be considered in addition to results prepared under current accounting standards, but are not a substitute for, or superior to, GAAP results. These non-GAAP measures are provided to enhance investors' overall understanding of PowerFleet's current financial performance. Specifically, PowerFleet believes the non-GAAP measures provide useful information to both management and investors by excluding certain expenses, gains and losses that may not be indicative of its core operating results and business outlook. Adjusted EBITDA is not a measure of financial performance or liquidity under GAAP and, accordingly, should not be considered as an alternate to net income or cash flow from operating activities as an indicator of operating performance or liquidity. Because PowerFleet's method for calculating the non-GAAP measures may differ from other companies' methods, the non-GAAP measures may not be comparable to similarly titled measures reported by other companies. Reconciliation of all non-GAAP measures included in this press release to the nearest GAAP measures can be found in the financial tables included in this press release.

Cautionary Note Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of federal securities laws. Forward-looking statements include statements with respect to PowerFleet's beliefs, plans, goals, objectives, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond PowerFleet's control, and which may cause its actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. All statements other than statements of historical fact are statements that could be forward-looking statements. For example, forward-looking statements include statements regarding: prospects for additional customers; potential contract values; market forecasts; projections of earnings, revenues, synergies, accretion or other financial information; emerging new products; and plans, strategies and objectives of management for future operations, including growing revenue, controlling operating costs, increasing production volumes, and expanding business with core customers. The risks and uncertainties referred to above include, but are not limited to, future economic and business conditions, the ability to recognize the anticipated benefits of the acquisition of Pointer, which may be affected by, among other things, the loss of key customers or reduction in the purchase of products by any such customers, the failure of the market for PowerFleet's products to continue to develop, the possibility that PowerFleet may not be able to integrate successfully the business, operations and employees of I.D. Systems and Pointer, the inability to protect PowerFleet's intellectual property, the inability to manage growth, the effects of competition from a variety of local, regional, national and other providers of wireless solutions, and other risks detailed from time to time in PowerFleet's, I.D. Systems' and Pointer's filings with the Securities and Exchange Commission, including I.D. Systems' annual report on Form 10-K for the year ended December 31, 2018, Pointer's annual report on Form 20-F for the year ended December 31, 2018 and PowerFleet's registration statement on Form S-4 filed with the Securities and Exchange Commission on May 24, 2019, as amended on July 1, 2019 and July 23, 2019. These risks could cause actual results to differ materially from those expressed in any forward-looking statements made by, or on behalf of, PowerFleet.
