I.D. Systems Receives Purchase Order From Leading Global Auto Maker for Wireless Industrial Vehicle Management System

WOODCLIFF LAKE, N.J., July 1, 2014 (GLOBE NEWSWIRE) -- I.D. Systems, Inc. (Nasdaq:IDSY), a leading provider of wireless M2M asset management solutions, has received a purchase order from one of the world's largest automotive manufacturers—a new customer—to deploy its PowerFleet® wireless Vehicle Management System (VMS) on a fleet of more than 250 industrial trucks, as part of a trial evaluation being conducted by the customer.

"This is an important trial program for us—an enterprise rollout with this customer could potentially involve thousands of vehicles," said Kenneth Ehrman, I.D. Systems' chairman and CEO. "Our PowerFleet VMS has had a long history of success in the automotive industry, where it has helped improve safety, reduce costs and improve efficiency in material handling operations. We are very excited to have the opportunity to demonstrate the value of our VMS technology to another global automotive manufacturer."

About Wireless Vehicle Management Systems

A wireless vehicle management system (VMS) helps improve workplace safety and security by restricting vehicle access to trained, authorized operators, providing electronic vehicle inspection checklists, and managing vehicle impacts. A wireless VMS helps reduce industrial fleet maintenance costs by automatically uploading vehicle data, reporting vehicle problems electronically, scheduling maintenance according to actual vehicle usage rather than by calendar or manual data entry, and helping determine the optimal economic time to replace equipment. In addition, a wireless VMS helps improve material handling productivity by establishing accountability for the use of equipment, ensuring equipment is in the proper place at the right time, and providing unique fleet utilization metrics.

About I.D. Systems

Headquartered in Woodcliff Lake, New Jersey, with subsidiaries in Texas, Germany, and the United Kingdom, I.D. Systems, Inc. is a leading global provider of wireless M2M solutions for securing, controlling, tracking, and managing high-value enterprise assets, including industrial vehicles, rental cars, trailers, containers, and cargo. The company's patented technologies address the needs of organizations to monitor and analyze their assets to increase efficiency and productivity, reduce costs, and improve profitability. PowerFleet® is a registered trademark of I.D. Systems. For more information, visit www.id-systems.com.

Cautionary Note Regarding Forward-Looking Statements

This press release contains forward looking statements within the meaning of federal

securities laws. Forward-looking statements include statements with respect to I.D. Systems' beliefs, plans, goals, objectives, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond I.D. Systems' control, and which may cause its actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. All statements other than statements of historical fact are statements that could be forward-looking statements. For example, forward-looking statements include: statements regarding prospects for additional customers; market forecasts; potential barriers to competition; projections of earnings, revenues, synergies, accretion or other financial information; and plans, strategies and objectives of management for future operations. The risks and uncertainties referred to above include, but are not limited to, future economic and business conditions, the loss of key customers or reduction in the purchase of products by any such customers, the failure of the market for I.D. Systems' products to continue to develop, the possibility that I.D. Systems may not be able to integrate successfully the business, operations and employees of acquired businesses, the inability to protect I.D. Systems' intellectual property, the inability to manage growth, the effects of competition from a variety of local, regional, national and other providers of wireless solutions, and other risks detailed from time to time in I.D. Systems' filings with the Securities and Exchange Commission, including its annual report on Form 10-K for the year ended December 31, 2013. These risks could cause actual results to differ materially from those expressed in any forward looking statements made by, or on behalf of, I.D. Systems. I.D. Systems assumes no obligation to update the information contained in this press release, and expressly disclaims any obligation to do so, whether as a result of new information, future events or otherwise.
