# KORE Executive Pat Verrington to Speak at TU Automotive Detroit 2015

*Machine-to-Machine Communications Expert to Share Insight on Connected Cars*

NOVI, Mich.--(BUSINESS WIRE)-- **TU Automotive Detroit—**KORE, the world's largest managed wireless network services provider specializing in Internet-of-Things (IoT) and machine-to-machine (M2M) communications, today announced that its Director of Integrated Services, Pat Verrington, will contribute insight on a panel at TU Automotive Detroit 2015. KORE will also demonstrate its specialized M2M network services in booth #A6 at the show, taking place June 3-4, 2015.

In the "The Aftermarket: Not Native? Not a Problem" session, Verrington and his fellow panelists will discuss how aftermarket cars have the potential to become connected cars through the use of Bluetooth, OBD2 ports and smartphones.

**About the Speaker**

Pat Verrington is director of Integrated Services at KORE. He is responsible for managing and growing KORE's subscription management and call center business applications which support the Audi Connect service today. In his 8 years with KORE, Mr. Verrington has established a strong track record of driving new initiatives for KORE including the introduction of high usage application solutions, promotion and delivery of the KORE M2M platform to MNO's and MVNO's worldwide and the launch and growth of the KORE CDMA service portfolio. Mr. Verrington has over 10 years of experience in M2M/wireless data applications and a strong foundation in product/service management, business development, sales management and customer support. Mr. Verrington also has more than 25 years of

experience in wireless data, digital cellular networks, value-added services and communications devices and graduated cum laude from Georgia State University with Bachelor of Business Administration in Computer Information Systems.

**About KORE**

KORE is the world's largest managed communications solutions provider specializing in Internet of Things (IoT) and Machine to Machine (M2M) markets. Providing unified control and management for cellular and satellite network service delivery in more than 180 countries worldwide, KORE empowers its application, hardware and wireless operator partners to efficiently deliver M2M solutions for connected devices across the globe. M2M applications in industries as diverse as healthcare, utilities, enterprise IT, transaction processing and fleet management rely on the KORE network to deliver operational efficiencies and cost-savings. KORE offers a range of technologies — including GSM, HSPA, CDMA EV-DO and LTE, as well as satellite services — that ensure the greatest possible reliability and coverage. Through its strategic growth plan, including the recent acquisition of RacoWireless, KORE is primed to deliver an unprecedented portfolio of connected technology, location-aware solutions and management tools in a way that has never before been experienced in the industry.
