KORE Delivers iPad-based IoT Solutions for Businesses

Leading M2M and IoT Services Provider Removes Barriers-to-Entry for Enterprise IT with Comprehensive iPad-based Business Solution

ATLANTA & BOSTON--(BUSINESS WIRE)-- [KORE](#), the world's largest managed wireless network services provider specializing in Machine-to-Machine (M2M) communication and the Internet of Things (IoT) is now providing businesses with a comprehensive solution for rapid iPad-based IoT business innovations and ROI. The solution streamlines complex technology and business challenges into one contract, device, platform and connection, removing cumbersome obstacles, such as hardware procurement, wireless carrier selection, cost management, application deployment and data security.

The Internet of Things is rapidly empowering new business models and opportunities, transforming the world into a marketplace of collecting, managing and gleaning business value from data. Mobile workers and field-based service agents are at the forefront of data utilization, but require a seamless combination of hardware, software and always-on connectivity to do so. KORE-powered, iPad-based solutions deliver comprehensive tools to tap one of the richest emerging areas for businesses to monetize the IoT.

With hardware, software and connectivity in one seamless solution, businesses are empowered to mobilize operations, from point of sale to field service automation. The end-to-end KORE iPad-based solution delivers processing power and data security for industries such as healthcare, utilities, insurance and commercial equipment servicing, where mobile and remote worker productivity and management are paramount.

"iPad and iOS represent the most secure, powerful and convenient solution for business users to remain productive in every work environment," said Alex Brisbane, CEO of KORE. "Coupled with our field-proven software management solutions and global connectivity, we're able to help businesses deliver tangible, near-term returns from the IoT."

KORE-powered iPads provide simplified and secure user operations by delivering pre-installed applications while delivering the processing speed, power and data capacity needed for complex workflows. Through enterprise-grade device and application management features, IT can manage multiple layers of security and through Mobile Device Management apps. And the iPad's power efficiencies enable mobile workers to stay up-and-running for an entire day on a tablet's single charge.

KORE delivers the most complete offering of global wireless connectivity through leading carriers, with flexible and dynamic pricing plans, global, redundant reliability, award-winning tools for device provisioning and cost management with speed to market with limitless scalability. Connectivity on the KORE network provides "always on" unconditional data

transmission across all geographies via a variety of cellular technologies, including GSM, HSPA, CDMA, EV-DO and LTE. For more information on turnkey iPad-based business solutions, contact KORE at info@korewireless.com, call 877.710.KORE or +44 (0) 203.478.5281, or visit iottablesolutions.korewireless.com.

About KORE

KORE provides the connectivity and services that make the Internet of Things possible. Founded in 2003, KORE is the worlds' largest managed network services provider specializing in Internet of Things (IoT) and Machine to Machine (M2M) markets. KORE provides the critical wireless connectivity empowering application, hardware and wireless operator partners to rapidly bring new IoT and M2M innovations to market, with millions of active on-network units in more than 110 countries. KORE delivers choice, reliability and global native coverage through multi-carrier and Tier 1 carrier cellular and satellite network services – including LTE, GSM and CDMA - as well as advanced applications to easily manage IoT connected devices. KORE [Position Logic](#) software provides seamless location-based services (LBS) for businesses.
