Callon Petroleum Company Reports Increased Earnings For Third Quarter, First Nine Months of 2008

NATCHEZ, Miss.--

Callon Petroleum Company (NYSE: CPE) today reported results of operations for both the three and the nine-month periods ended September 30, 2008.

Third Quarter and Nine Months 2008 Net Income. For the quarter ended September 30, 2008, the company reported net income of \$5.9 million, which was 156% higher than the \$2.3 million reported for the same period in 2007. Net income per share was \$0.27 and \$0.11 for the quarters ended September 30, 2008 and 2007, respectively. For the nine months ended September 30, 2008, Callon reported net income of \$18.6 million, or \$0.85 per share after a one-time charge of \$11.9 million, or \$0.35 per share, net of tax, related to the early extinguishment of debt under the company's \$200 million Senior Revolving Credit Facility which was retired in April 2008. This compares with net income of \$10.7 million, or \$0.50 per share during the same period of 2007. All per share amounts are on a diluted basis.

Third Quarter and Nine Months 2008 Operating Results. Operating results for the third quarter of 2008 were impacted by two back-to-back Hurricanes. On August 30, 2008 several of the company's fields were shut-in due to the approach of Hurricane Gustav and, subsequently, Hurricane Ike. Primarily as a result of damage caused by those two storms to third-party transmission lines and downstream facilities which process Callon's crude oil and natural gas, production of approximately 12.6 million cubic feet of natural gas equivalent per day (MMcfe/d) was deferred during the third quarter of 2008. Average daily production in the third quarter was 25.9 MMcfe/d. Operating results for the three months ended September 30, 2008 include oil and gas sales of \$32.8 million. This corresponds to sales of \$37.9 million from average production of 45.4 MMcfe/d during the comparable 2007 period. The average price received per thousand cubic feet of natural gas (Mcf) in the third quarter of 2008, after the impact of hedging, increased to \$10.77 compared to \$7.73 during the third quarter of 2007. The average price received per barrel of oil (Bbl) in the third quarter of 2008, after the impact of hedging, increased to \$99.40, compared to \$71.29 during the same period a year earlier. Oil and natural gas sales for the first nine months of 2008 totaled \$125.8 million from average production of 35.0 MMcfe/d. This corresponds to sales of \$126.8 million from average production of 53.2 MMcfe/d during the same period in 2007. The average price received per Mcf in the nine-month period of 2008, after the impact of hedging, increased to \$10.53, compared to \$7.97 during the first nine months of 2007. The average price received per Bbl in the nine months of 2008, after the impact of hedging, increased to \$94.89, compared to \$62.09 during the same period in 2007.

Third Quarter and Nine Months 2008 Discretionary Cash Flow. Discretionary cash flow for the three-month period ended September 30, 2008 totaled \$21.9 million compared to \$21.0 million during the comparable prior year period. Net cash flow provided by operating activities, as defined by GAAP, totaled \$60.9 million and \$19.8 million during the quarters ended September 30, 2008 and 2007, respectively. Discretionary cash flow for the first nine months of 2008 totaled \$81.2 million compared to \$79.4 million during the same period in 2007. Net cash flow provided by operating activities, as defined by GAAP, totaled \$124.8 million and \$89.9 million during the nine-month periods ended September 30, 2008 and 2007, respectively. (See "Non-GAAP Financial Measure" that follows and the accompanying reconciliation of discretionary cash flow, a non-GAAP measure, to net cash flow provided by operating activities.)

Non-GAAP Financial Measure. This news release refers to a non-GAAP financial measure as "discretionary cash flow." Callon believes that the non-GAAP measure of discretionary cash flow is useful as an indicator of an oil and gas exploration and production company's ability to internally fund exploration and development activities and to service or incur additional debt. The company also has included this information because changes in operating assets and liabilities relate to the timing of cash receipts and disbursements which the company may not control and may not relate to the period in which the operating activities occurred. Discretionary cash flow should not be considered an alternative to net cash provided by operating activities or net income as defined by GAAP.

Measure:	Ended		Ended	
(In thousands)	September 30,		September 30,	
	2008	2007	2008	2007
