NetSol Technologies Releases White Paper on Enterprise Mobility for Auto Finance and Leasing Sector

Putting Auto Captives and Dealerships in the Driver's Seat to Increase Efficiencies

CALABASAS, Calif., Aug. 14, 2015 (GLOBE NEWSWIRE) --[NetSol Technologies, Inc.](http://www.netsoltech.com) (NASDAQ:NTWK), a global provider of IT and enterprise software solutions, today announced the availability of a white paper, "Enterprise Mobility: Putting Auto Finance Funders into the Driving Seat."

The paper highlights the global mobility revolution and how the rapid shift to mobile devices is shaping the international auto leasing industry, including:

- Giving access to real-time information, allowing for faster and more informed actions, reducing origination time and decision making;
- Opening the way for financial organizations to go paperless, improving operational efficiencies and cutting costs associated with printing and mailing documents to customers and other institutions, as well as eliminating lengthy response times; and
- Creating closer connections with customers, by offering financial information on the spot, reducing paperwork, resulting in improved customer satisfaction.

"NetSol's research shows how mobile technology is positively impacting the global auto leasing industry," said Najeeb Ghauri, CEO of NetSol Technologies. "Our own mobility solutions, ranging from mobile point-of-sales to mobile collections, provide a new way for automotive companies to conduct business, improve collaboration and foster customer loyalty."

Earlier in the year, NetSol completed a Mobile Point-of-Sale (mPOS) implementation with a leading auto company allowing its dealers to perform the contract origination process through a mobile device. Following implementation, which took less than 90 days and included user training, the client saw significant improvement in origination time and efficiency. Today, 60 percent of the client's originations are generated through NetSol's mPOS application.

The white paper is available free for download at <http://mobility.netsoltech.com/whitepaper>
