# Rennova Health Adds Electronic Medication Administration Record to M2Select Electronic Health Record Product

WEST PALM BEACH, Fla.-- **Rennova Health Inc. (NASDAQ:RNVA) (NASDAQ:RNVAW)** announces that its wholly owned electronic health records software developer Medical Mime, Inc. has added electronic medication management software to its flagship M2Select electronic health record (EHR) product. Launched in the fourth quarter of 2015, M2Select is sold to substance abuse treatment and behavioral health providers.

Electronic Medication Administration Record, or eMAR, is designed to replace paper-based medicine tracking and reconciliation. This integrated solution makes it possible for substance abuse centers and facilities to improve efficiencies by eliminating a number of paper-centric processes. eMAR clearly and simply informs physicians of all medications to be given to a patient in an organized manner, thus improving communication between facility staff and the pharmacy, and reducing the risk of medication dispensing errors. Simply put, eMAR automates everything – gathering, consolidating and presenting data with more speed and accuracy than any manual system. eMAR also saves time and money, and allows for better traceability and access to historical records, which ultimately creates a higher standard of care for resident patients.

“The ability to offer this eMAR function in our EHR software takes us a step closer to achieving our goal of providing a fully integrated practice management solution. In addition to efficiency and compliance benefits, eMAR provides our customers with the necessary tools to achieve certain accreditations that are now required by payers,” said Seamus Lagan, CEO of Rennova. “We are already seeing benefits to our growth strategy, with customers electing to integrate this software product and our laboratory services. We look forward to completing the development of automatic charge capture and billing services to further increase efficiencies for our customers and create a longer-term and sustainable relationship with them.”

## **About Medical Mime, Inc.**

Medical Mime, is a dictation-based electronic health records (EHR) company and a wholly owned subsidiary of Rennova Health, Inc. Medical Mime offers a suite of highly-specialized software modules to create customized technology solutions. M2Select EHR is designed for facilities that specialize in substance abuse treatment and behavioral health; M2Pro EHR is for small-to-medium sized physician practices, and M2Speak is a dictation and transcription product for medical providers.
