XORTX invites individual and institutional investors, as well as advisors and analysts, and notes that if attendees are not able to join the live event on the day of the conference, an archived webcast will also be made available after the event. It is recommended that investors pre-register and run the online system check to expedite participation and receive event updates.

Dr. Allen Davidoff's presentation will highlight how XORTX is redefining how kidney disease is treated. The presentation outlines the critical issues facing millions of patients with progressive kidney disease due to diabetes, diabetic nephropathy and polycystic kidney disease and the compelling studies and mounting evidence confirming XORTX's approach.

Company Highlights

- XORTX has two lead programs to develop treatments for progressive kidney disease due to diabetes, diabetic nephropathy and polycystic kidney disease
 - XORTX's XRx-008 (a proprietary reformulation of Oxypurinol) is a late stage drug development program to treat autosomal dominant polycystic kidney disease (ADPKD)
 - TMX-049, is a late phase 2b stage program to treat type 2 diabetic nephropathy (T2DN), under a co-development agreement with Japan's Teijin Pharma Limited, pursuant to a non-binding Letter of Intent.
 - PKD Foundation has recognized XORTX as a leader in advancing the development of treatments for progressive kidney disease
- Clinical study evidence that XORTX's approach to uric acid lowering is key to treating and preventing chronic kidney disease

- Nature Nephrology Review published July 11, 2019 highlights clinical studies confirming causal relationship between uric acid and chronic kidney disease
- TODAY Study confirms that Adolescents with Type 2 Diabetes are at higher risk of kidney disease due to increased uric acid
- American Diabetes Association Journal publication of Pilemann-Lyberg et al study on patients with Type 1 diabetic nephropathy supports uric acid as an independent risk factor – expands XORTX's pipeline under existing patents
