Huntsman To Acquire Rockwood's Performance Additives And Titanium Dioxide Businesses

THE WOODLANDS, Texas, Sept. 17, 2013 /PRNewswire/ --

- Purchase price of \$1.1 billion in cash plus the assumption of unfunded pension liabilities
- Immediately accretive to Huntsman earnings per share
- \$0.60 annual per share accretion assuming 2014 estimated results and full impact of \$130 million expected cost savings
- Public offering of the Huntsman and Rockwood combined Pigments businesses within two years of close

Huntsman Corporation (NYSE: HUN) and Rockwood Holdings, Inc. (NYSE:ROC) announced today that they have entered into a definitive agreement whereby Huntsman will acquire Rockwood's Performance Additives and Titanium Dioxide (TiO₂) businesses. Under the terms of the agreement Huntsman will pay approximately \$1.1 billion in cash and assume unfunded pension liabilities estimated at \$225 million as of June 30, 2013.

Peter R. Huntsman, President and CEO of Huntsman Corporation, commented:

"This acquisition provides a unique opportunity to unlock value within our Pigments business and builds on the strong improvements we have made to its competitiveness. With this combination we will be better positioned to serve customers through a broader product range including color pigments, functional additives and specialty TiO₂ pigments. We will become the second largest global producer of TiO₂ and inorganic color pigments.

"The transaction announced today is the next step in our long term value creation strategy for our Pigments business. We anticipate TiO₂ demand will continue to recover in the coming quarters, and during this time we will be focused on strengthening our world class Pigments business and capturing approximately \$130 million in expected annual cost savings, to be fully achieved by the end of 2015. We plan to further unlock value through a public offering of our new combined Pigments business, which we expect to pursue within two years of completing this acquisition.

"In addition to creating a \$3 billion Pigments leader, we believe this public offering will allow greater investor focus and appreciation for our differentiated businesses. These remaining divisions continue to enjoy record financial performance and global growth. We are well on our way to capturing the previously announced \$220 million in annual savings through restructuring in our existing business and we have a number of capital projects underway that will increase our future earnings potential. Reducing our financial leverage remains a

priority and we expect to return to our debt/EBITDA target ratio of 2 to 2.5 times by 2015."

The cash purchase price of \$1.1 billion represents a multiple of 5.5 times estimated 2014 adjusted EBITDA of \$200 million, or 3.3 times including \$130 million in expected annual cost savings. The transaction will be immediately accretive to earnings per share, and is expected to add \$0.60 annual per share accretion assuming 2014 estimated results and full impact of expected cost savings.

Rockwood's Performance Additives and TiO₂ business includes the manufacture and supply of sulphate process TiO₂, synthetic iron-oxide and other organic pigments, timber treatment products and specialty automotive materials. Applications for these products are used in coatings, construction, concrete, plastics, papers, inks, food, cosmetics, pharmaceuticals, fibers and films.

Financing commitments are in place to fund the acquisition. The transaction remains subject to regulatory approvals and customary closing conditions and is expected to close in the first half of 2014.

BofA Merrill Lynch served as financial advisor and Vinson & Elkins as legal advisor.

Huntsman will hold a conference call to discuss the transaction today, September 17, 2013 at 8:30 a.m. ET.
