

Phunware Releases PhunWallet Version 1.3 Mobile App Update

Updates to the Innovative Cryptocurrency Wallet and Mobile Application Include New User Registration System, Access Across Devices, & Personal Referral QR Codes

AUSTIN, Texas, June 21, 2022 (GLOBE NEWSWIRE) -- [Phunware, Inc.](#) (NASDAQ: [PHUN](#)) ("Phunware" or "the Company"), a fully-integrated [enterprise cloud platform](#) for mobile ("MaaS") that provides products, solutions, data and services for brands worldwide, today announced the release of [PhunWallet](#) version 1.3, an updated mobile application software on the Apple App Store and Google Play for Android.

The latest app update enables users to log in and out across devices seamlessly, using the same username and password to easily access their accounts. It also offers users more opportunities to earn [PhunToken](#) (PHTK), the innovative cryptocurrency created by Phunware to reward consumers for their engagement in profitable behaviors, such as completing surveys or watching videos from specific brands.

"The updates to PhunWallet make it easier for users to take control of their data and participate in a decentralized data economy," said **Andrew Soltan, Vice President of Engineering at Phunware**. "Delivering seamless access to PhunWallet across devices allows consumers more opportunities to earn rewards."

PhunWallet version 1.3 also introduces personal QR code referrals, upgrading from the share link referrals previously promoted by the app. Now users can quickly sync up with friends and family by scanning their personal QR code and easily invite them to start earning rewards on the app. For each completed referral, users can earn PhunToken.

To celebrate the update, PhunWallet held a special in-app referral contest from June 9 to June 19, resulting in over 10,000 new users registering on the app.

"Users can now easily surface a QR code with their inner circle, so they can start earning rewards as well," said **Mr. Soltan**.

PhunWallet is the official mobile app of Phunware's blockchain-enabled data exchange and mobile loyalty ecosystem where consumers can manage both PhunToken and [PhunCoin](#).
