# **C-Bond Systems Achieves Record Revenue in 2019 including \$358,000 from Sales of its Ballistic-Resistant System**

## **Sales of C-Bond BRS grew more than 60% year-over-year**

HOUSTON, Jan. 21, 2020 (GLOBE NEWSWIRE) -- [C-Bond Systems](#) (the “Company” or “C-Bond”) (OTC: CBNT), a nanotechnology company that improves and strengthens glass, announced today that it achieved record revenue in 2019, including more than \$358,000 from sales of C-Bond BRS, its ballistic-resistant film system. Sales of C-Bond BRS grew more than 60% year-over-year.

C-Bond BRS consists of the patented C-Bond glass strengthening nanotechnology and a private-label security film. The C-Bond technology increases glass strength and flexibility by chemically bonding to the defects randomly distributed on the glass surface. C-Bond BRS has been installed in schools, government buildings, media organizations, and other high-security facilities around the country.

C-Bond BRS is validated by an independent third-party laboratory to provide National Institute of Justice (NIJ) Level I, Level IIA, Level II, and Underwriters Laboratories (UL) 752 ballistic-resistant protection.

“We are extremely proud that we reported record revenue in 2019, both in total and for C-Bond BRS,” stated Scott R. Silverman, Chairman and CEO of C-Bond. “To further the growth of C-Bond BRS in 2020 and beyond, we will continue to focus on media outlets, among other organizations, which have become a significant customer for this important security product.”

C-Bond’s glass strengthening technology is protected by 23 patents and patent pending applications. The C-Bond solution increases the mechanical properties of the window glass unit, enabling the glass to dissipate higher energy by targeting and repairing the microscopic flaws and defects that are randomly distributed naturally on the glass surface. These surface imperfections weaken the glass composite structure and initiate failures. C-Bond chemically bonds to the defects increasing both strength and flexibility.

### **About C-Bond**

C-Bond Systems, Inc., headquartered in Houston, Texas, is an advanced nanotechnology company and sole owner, developer and manufacturer of the C-Bond technology. C-Bond is a patent-protected nanotechnology that is scientifically tested and commercially proven to significantly increase the strength, safety and performance levels of glass and window film products. *Statements in this press release about our future expectations, including the likelihood that to further the growth of C-Bond BRS in 2020 and beyond, we will continue to focus on media outlets, among other organizations, which have become a significant customer for this important security product; constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Litigation Reform Act of 1995. Such forward-looking statements involve risks and uncertainties and are subject to change at any time, and our actual results could differ materially from expected results. These risks and uncertainties include, without limitation, C-Bond's ability to raise capital; the Company's ability to successfully commercialize its products; as well as other risks. Additional information about these and other factors may be described in the Company's filings with the Securities and Exchange Commission ("SEC") including its Form 10-K filed on April 1, 2019, its Forms 10-Q filed on November 14, 2019, August 12, 2019, and May 10, 2019, and in future filings with the SEC. The Company undertakes no obligation to update or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this statement or to reflect the occurrence of unanticipated events, except as required by law.*
