### About Recro Pharma, Inc.

Recro is a revenue-generating, specialty pharmaceutical company primarily focused on developing innovative products for hospitals and ambulatory care settings. The Company's lead product candidate, injectable meloxicam, is a proprietary injectable form of meloxicam, a long-acting preferential COX-2 inhibitor that has successfully completed four Phase II clinical trials in the treatment of moderate to severe postoperative pain, and two pivotal Phase III clinical trials in patients following bunionectomy and abdominoplasty surgeries. As injectable meloxicam is not in the opioid class of drugs, the Company believes it will overcome many of the issues associated with commonly prescribed opioid therapeutics, including addiction, misuse/diversion, respiratory distress and constipation while maintaining analgesic, or pain relieving, effect.

In addition to developing proprietary drug candidates, Recro, through its subsidiary, Recro Gainesville LLC, leverages its formulation expertise to develop and manufacture pharmaceutical products using its proprietary delivery technologies for commercial partners who commercialize or plan to commercialize these products. These collaborations result in revenue streams including royalties, profit sharing, research and development and manufacturing, which support continued operations for Recro Gainesville as well as the Company's research and development of proprietary product candidates.
