OncoSec Presentation

February 28, 2012

10:30am PT

The 10th Annual BioPartnering North America is a conference held in the Pacific Rim tapping into the fourth largest biotech cluster in the world. It attracts life science professionals from across the globe with the aim of building close ties between industry leaders. Past attendance has seen delegates from the United States, Canada, Europe, Japan, Korea as well as China and is expected to continue to grow in diversity.

About OncoSec Medical Inc.

OncoSec Medical Incorporated is a biopharmaceutical company developing its advanced-stage OMS ElectroOncology therapies to treat solid tumor cancers and metastatic disease. OMS ElectroOncology therapies address an unmet medical need and represent a potential solution, for less invasive and less expensive therapies that are able to minimize detrimental effects resulting from currently available cancer

treatments such as surgery, systemic chemotherapy or immunotherapy and other treatment alternatives. OncoSec's core technology is based upon its proprietary use of an electroporation platform, the OncoSec Medical System (OMS), to dramatically enhance the delivery and uptake of a locally delivered DNA-based immuno-cytokine (OMS ElectroImmunotherapy) or chemotherapeutic agents (OMS ElectroChemotherapy). Treatment of various solid cancers using these powerful and targeted anti-cancer agents has demonstrated selective destruction of cancerous cells while sparing healthy normal tissues during early and late stage clinical trials. OncoSec's clinical programs include three Phase II clinical trials for OMS ElectroImmunotherapy targeting lethal skin cancers. More information is available at www.oncosec.com. Additional information may also be found at OncoSec's [Facebook](#), [Twitter](#), and [LinkedIn](#) sites.

This press release contains forward looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Any statements in this release that are not historical facts may be considered such "forward looking statements." Forward looking statements are based on management's current preliminary expectations and are subject to risks and uncertainties which may cause our results to differ materially and adversely from the statements contained herein. Some of the potential risks and uncertainties that could cause actual results to differ from those predicted include our ability to raise additional funding, our ability to acquire, develop or commercialize new products, uncertainties inherent in pre-clinical studies and clinical trials, unexpected new data, safety and technical issues, competition and market conditions. These and additional risks and uncertainties are more fully described in OncoSec's filings with the Securities and Exchange Commission. Undue reliance should not be placed on forward looking statements which speak only as of the date they are made. OncoSec disclaims any obligation to update any forward looking statements to reflect new information, events or circumstances after the date they are made, or to reflect the occurrence of unanticipated events.
