The above comparisons of the Q4 2019 and fiscal year 2019 results are to the Company’s results for Q4 2018 and the fiscal year 2018, respectively, which are reported periods prior to the completion of the transformative acquisitions of Medexus Inc. and Medac Pharma, Inc. (the “**Acquisitions**”).

Ken d’Entremont, Chief Executive Officer of Medexus, commented, “We have made exceptional progress as an organization since the completion of the Company’s transformative transactions in the fall of 2018 when we merged the businesses of Pediapharm Inc., Medexus Inc. and Medac Pharma, Inc. I am pleased to report we generated strong revenue growth for the fiscal fourth quarter, which was ahead of

expectations given the typical seasonality of our business. For the full year, sales increased 238%, reflecting both the mergers and strong organic growth across much of the Company's product portfolio. We also generated positive Adjusted EBITDA of \$2.4 million for the full year versus negative \$2.3 million in fiscal 2018. Overall, we have built a strong commercial platform and are now well positioned as a leading North American specialty pharmaceutical company with a diversified portfolio."

### **Operational highlights:**

- **Launch of Metoject®** - On May 1, 2019, the Company launched a new Metoject Subcutaneous 15mg dose in Canada for the treatment of rheumatoid arthritis, psoriasis and psoriatic arthritis. The new 15mg dose of Metoject Subcutaneous is an important addition to the Metoject line the Company currently has in Canada and the Company expects this dose to be a significant portion of our Metoject volume going forward. Metoject is now publicly reimbursed in Canada and has experienced unit sales growth of 319% in Q4 2019 as compared to Q4 2018, and 293% unit sales growth in the twelve-month period ended March 31, 2019 compared to the same period last year.<sup>2</sup>
- **Rasuvo™ Growth in Unit Sales** – Sales in units of Rasuvo increased by approximately 5% in Q4 2019 as compared to Q4 2018, and by 14% in the twelve-month period ended March 31, 2019 compared to the same period last year.<sup>3</sup> The Company is planning to launch additional methotrexate products for the treatment of rheumatoid arthritis and other auto-immune diseases built around unique delivery methods. The registration process for one of these products is taking longer than anticipated. In the meantime, we continue to explore other next generation products and have initiated work on a product intended to better address the needs of patients currently treated with methotrexate.
- **Rupall™ Growth in Units Sales** -Rupall has experienced very strong unit sales growth, increasing by approximately 77% in Q4 2019 as compared to Q4 2018, and by 109% in the twelve-month period ended March 31, 2019 compared to the same period last year.<sup>4</sup>
- **Authorization by Health Canada to Distribute Treosulfan** - During the fiscal fourth quarter, the Company was granted authorization by Health Canada to distribute Treosulfan under the Special Access Program and is now shipping to hospitals across Canada. The Company expects to expand distribution of Treosulfan in Canada once the product has received approval as a fully registered product and believes that this further validates the Company's ability to leverage the combined product portfolios and our North American sales force.
- **Exclusive Canadian Distribution Rights for Gliolan®** - On March 4, 2019, the Company obtained exclusive rights in Canada to market and distribute Gliolan®, which assists neurosurgeons to better visualize and more completely remove malignant brain tumors (gliomas) by causing them to become fluorescent and glow during surgery. We continue to receive positive feedback from the medical community on this product and have witnessed a strong market uptake.

Ken d'Entremont further commented that: "We are excited about the opportunities within our portfolio of products. We continue to experience strong year-over-year growth and we are very optimistic in respect of the new fiscal year. We also have \$29.2 million of cash and cash equivalents and a working capital surplus of approximately \$32.7 million, which means we are well funded to continue our organic growth, license new products, as well as explore opportunistic acquisitions. We also recently announced a normal course issuer bid, which we expect will reduce the number of shares outstanding and increase the earnings per share, which we believe will help further drive shareholder value."
