# Greenwich LifeSciences to Resume Stock Repurchase Program

STAFFORD, Texas--(BUSINESS WIRE)-- Greenwich LifeSciences, Inc. (Nasdaq: GLSI) (the "Company"), a clinical-stage biopharmaceutical company focused on the development of GLSI-100, announced today it would resume its existing Stock Repurchase Program.

Under the repurchase program previously authorized by the board of directors, Greenwich LifeSciences may repurchase its outstanding shares of common stock from time to time in open market or privately-negotiated transactions, including accelerated share repurchase transactions, block trades, or pursuant to 10b5-1 trading plans. Any repurchases will be at management's discretion and will be subject to market conditions, the price of the Company's shares and other factors. The stock repurchase program may be modified, suspended or terminated by the Board of Directors at any time.

The Company has approximately \$4.5 million available under the current program. As of its most recently reported quarter-end March 31, 2022, the Company had 12,951,453 shares of common stock outstanding.

## About Greenwich LifeSciences, Inc.

Greenwich LifeSciences is a clinical-stage biopharmaceutical company focused on the development of GP2, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery. GP2 is a 9 amino acid transmembrane peptide of the HER2/neu protein, a cell surface receptor protein that is expressed in a variety of common cancers, including expression in 75% of breast cancers at low (1+), intermediate (2+), and high (3+ or over-expressor) levels. In a completed randomized, single-blinded, placebo-controlled, multi-center Phase IIb clinical trial led by MD Anderson Cancer Center, no recurrences were observed in patients treated with GLSI-100 in the HER2/neu 3+ adjuvant setting after median 5 years of follow-up, if the patients were treated, followed, and remained disease free over the first 6 months, which is the time required to reach peak immunity and thus maximum efficacy and protection ( $p = 0.0338$ ). For the 146 patients who have been treated with GLSI-100 to date over 4 clinical trials, treatment was well tolerated and no serious adverse events were observed related to the immunotherapy. Greenwich LifeSciences is planning to commence a Phase III clinical trial using a similar treatment regime as the Phase IIb clinical trial.
