Important Notice and Safe Harbor Statement

This presentation contains forward looking statements that involve substantial risks and uncertainties. All forward-looking statements included in this presentation are made only as of the date hereof and are subject to change without notice. Actual outcomes and results could differ materially from those suggested by this presentation due to the impact of many factors beyond the control of New Mountain Finance Corporation ("NMFC"), including those listed in the "Risk Factors" section of our filings with the United States Securities and Exchange Commission ("SEC"). Any such forward-looking statements are made pursuant to the safe harbor provisions available under applicable securities laws and NMFC assumes no obligation to update or revise any such forward-looking statements unless required by law.

Certain information discussed in this presentation (including information relating to portfolio companies) was derived from third party sources and has not been independently verified and, accordingly, NMFC makes no representation or warranty with respect to this information.

The following slides contain summaries of certain financial and statistical information about NMFC. The information contained in this presentation is summary information that is intended to be considered in the context of our SEC filings and other public announcements that we may make, by press release or otherwise, from time to time. We undertake no duty or obligation to publicly update or revise the information contained in this presentation unless required by law. In addition, information related to past performance, while helpful as an evaluative tool, is not necessarily indicative of future results, the achievement of which cannot be assured. You should not view the past performance of NMFC, or information about the market, as indicative of NMFC's future results. The performance data stated herein may have been due to extraordinary market conditions, which may not be duplicated in the future. Current performance may be lower or higher than the performance data quoted. This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities of NMFC.

Investment portfolio related activity, metrics and disclosures on slides 5, 10, 11, 14, 18, 19, 20, 22, 24 and 29 include the underlying collateral from securities purchased under collateralized agreements to resell. Figures shown herein are unaudited and may not add due to rounding.

This presentation may also contain non-GAAP financial information. NMFC's management uses this information in its internal analysis of results and believes that this information may be informative to investors in gauging the quality of NMFC's financial performance, identifying trends in our results and providing meaningful period-to-period comparisons.

The term Adjusted Net Investment Income as used throughout this presentation is not defined under GAAP and is not a measure of operating income, operating performance or liquidity presented in accordance with GAAP. In evaluating its business, NMFC considers and uses Adjusted Net Investment Income as a measure of its operating performance. Adjusted Net Investment Income is defined as net investment income adjusted to reflect income as if the cost basis of investments held at NMFC's IPO date had stepped-up to fair market value as of the IPO date. Under GAAP, NMFC's IPO did not step-up the cost basis of the predecessor operating company's existing investments to fair market value. Since the total value of the predecessor operating company's investments at the time of the IPO was greater than the investments' cost basis, a larger amount of amortization of purchase or issue discount, and different amounts in realized gains and unrealized appreciation, may be recognized under GAAP in each period than if a step-up had occurred. For purposes of the incentive fee calculation, NMFC adjusts income as if each investment was purchased at the date of the IPO (or stepped-up to fair market value). **To view the reconciliation of Adjusted Net Investment Income, please see Appendix A at the end of this presentation.**

¹ Reflects pro forma adjusted NII; see Appendix A for adjustments

² Defined as the % of portfolio companies (by fair value) with LTM EBITDA at the time of investment less than \$100m and facility sizes as of each date less than \$300m

³ Current Yield at Cost is calculated as annual stated interest rate plus annual amortization of original issue discount and market discount / premium earned on accruing debt and other income producing securities divided by total accruing debt and other income producing securities at amortized cost

⁴ Yield to Maturity ("YTM") at Cost assumes that the accruing investments in our portfolio as of each date are purchased at cost on that date and held until their respective maturities with no prepayments or losses and are exited at par at maturity. This calculation excludes the impact of existing leverage. YTM at Cost uses the LIBOR curves at each quarter's respective end date. The actual yield to maturity may be higher or lower due to the future selection of LIBOR contracts by the individual companies in our portfolio or other factors. See "Important Notice and Safe Harbor Statement."

⁵ Excludes PIK ("payment-in-kind" interest), revolvers, unfunded commitments, bridges, return of capital, and realized gains / losses

Review of NMFC

Overview

- Founded in October 2008 to apply New Mountain Capital, L.L.C.'s ("NMC" or "New Mountain") private equity strengths to attractive risk-reward opportunities in the U.S. debt markets
 - New Mountain is a leading alternative investment firm with more than \$15 billion of assets under management⁽¹⁾ and over 100 staff members
- Externally managed Business Development Company ("BDC")
 - Initial Public Offering ("IPO") completed in May 2011 (NYSE: NMFC)
 - Public float market capitalization has increased from \$147 million at IPO to \$879 million as of September 30, 2016
- Targets investments up to a \$50 million hold size in:
 - "Defensive growth" middle market companies, typically generating \$20 – \$200 million of EBITDA
 - Senior secured debt (1st lien, 2nd lien or uni-tranche), mezzanine and other subordinated securities

Strategy

- NMFC's mandate is to primarily target businesses in the middle market that, consistent with New Mountain's private equity platform, are **quality, defensive growth** companies, in industries that are **well-researched** by New Mountain
- Mandate achieved by **utilizing existing New Mountain investment team** as primary underwriting resource; team combines operating executives with financial executives
- Target loan to value ratios typically average less than 50% of both sponsor purchase price and NMC valuation

Key Investment Highlights

- Strong track record on credit and returns
- Well established New Mountain platform provides unique knowledge warehouse and sourcing capabilities
- Differentiated "defensive growth" investment strategy
- High quality and diverse portfolio
- Experienced management team who are also significant shareholders

NMFC Relative Return Performance – Indexed Total Return

¹ BDC Index includes median of Ares, Apollo, Prospect, Solar, Fifth Street, Blackrock Capital, Pennant Park, MVC, Golub, THL Credit, Gladstone, Medley, Solar Senior and Horizon Technology; equal-weighted

NMFC Cumulative Total Return Performance Versus Peers⁽¹⁾

May 19, 2011 (IPO) – November 4, 2016

Source: Capital IQ

¹ Peers include publicly-traded, externally-managed BDCs with market capitalizations greater than \$300 million that have been publicly traded since NMFC's IPO (5/19/2011). Peers include Ares, Apollo, Prospect, Solar, Fifth Street, Blackrock Capital, Pennant Park, Golub, THL Credit, and Medley

NMFC Return Attribution

(\$ per Share)

Since IPO, NMFC has distributed \$7.30 per share in regular dividends and \$0.61 per share in special dividends, and NMFC public shares have traded up from \$13.75 at IPO to \$13.76 at close on 9/30/2016

¹ NMFC priced its initial public offering on 5/19/2011 at \$13.75 per share; closing price on 9/30/2016 of \$13.76 per share

² Increase in value from trading multiple expansion shown only for cumulative period and is equal to change in share price over period less change in book value per share

Credit Performance

(\$ in millions)

¹ Since inception of predecessor entity in 10/2008 through 9/30/2016

² Determined on a quarterly basis by Management. In addition to various risk management and monitoring tools, NMFC also uses a four-level numeric investment rating system to characterize and monitor the credit profile and expected level of returns on each portfolio investment. Ratings of 1 and 2 indicate the investment is performing materially above, or materially in-line, with expectations, respectively. All new loans are rated 2 when approved. A rating of 3 indicates the investment is performing materially below expectations and risk has increased materially since the original investment. A rating of 4 indicates the investment is performing substantially below expectations and risks have increased substantially since the original investment. Payments may be delinquent. There is a meaningful possibility that we will not recoup our original cost basis in the investment and may realize a substantial loss upon exit. Where it is determined that an investment is underperforming, or circumstances suggest that the risk associated with a particular investment has significantly increased, a more aggressive monitoring of the affected portfolio company will be undertaken

³ Refers to the investments in Transtar Holdings and Permian Tank & Manufacturing

⁴ Realized default loss represents positions, or portions of positions, where no recovery is expected

Credit Market Conditions

- Credit markets continue to be strong
 - Generally positive fund flows into leveraged credit driven by continued investor desire for yield in current low rate environment
 - Healthy balance between new deal flow and investor demand for new issue
 - Significant private equity dry powder
- Spreads have been broadly stable since our last call
 - There has been some recent volatility related to fears of rising interest rates
- NMFC works to be well positioned to capitalize on volatile markets:
 - NMC and NMFC have **always** proactively focused on defensive, acyclical business models
 - Wells Fargo leverage facility not subject to margin calls
 - Positive exposure to increasing rates

New Mountain Net Lease Corporation (“Net Lease”)

- In August 2016, NMFC began investing in a newly formed real estate entity (“Net Lease”) to invest in net lease real estate opportunities
 - Capitalized with equity from NMFC and non-recourse asset level leverage
 - Stand-alone, actively-managed operating entity (not consolidated by NMFC)
 - Structured as a REIT
- We believe corporate net lease real estate is an attractive addition to our platform due to:
 - Strong yield with contractual annual rent escalators
 - No prepayment risk with long-duration (12 to 20 years), non-cancelable leases
 - Downside protection by owning difficult-to-vacate, operationally essential facilities housed in fundamentally sound real estate that can be renovated, rehabilitated, further developed, re-tenanted or re-positioned over time
 - Leveraging of existing corporate research in another value-added way
- We anticipate Net Lease, once ramped, to generate an attractive return on equity for NMFC (low to mid-teens anticipated yield)
- NMFC invested \$16.5 million of equity in the entity which closed two deals during Q3 2016
