Qualcomm Revolutionizes Smartphones and Computing Devices with Game-Changing Wi-Fi 6 and Bluetooth 5.1 Connectivity SoC

New Connectivity SoC advances beyond the standard specifications to deliver breakthrough performance for the 5G era

BARCELONA, Spain, Feb. 25, 2019 /PRNewswire/ -- Qualcomm Technologies, Inc. a subsidiary of Qualcomm Incorporated (NASDAQ: QCOM), today announced the Qualcomm® QCA6390 Connectivity system-on-a-chip (SoC), the company's most advanced integrated offering yet, providing superior Wi-Fi and Bluetooth performance for mobile and computing devices. The QCA6390 is the world's first announced 14nm integrated SoC to support the full feature suites of both Wi-Fi 6 and Bluetooth 5.1. Built to meet the surging connectivity demands of today's world, the QCA6390 is designed to deliver faster, more secure and robust Wi-Fi experiences and enable new Bluetooth audio capabilities such as ultra-high-definition voice and low-latency gaming over wireless headphones, earbuds and speakers.

About Qualcomm

Qualcomm invents breakthrough technologies that transform how the world connects, computes and communicates. When we connected the phone to the Internet, the mobile revolution was born. Today, our inventions are the foundation for life-changing products, experiences, and industries. As we lead the world to 5G, we envision this next big change in cellular technology spurring a new era of intelligent, connected devices and enabling new opportunities in connected cars, remote delivery of health care services, and the IoT — including smart cities, smart homes, and wearables. Qualcomm Incorporated includes our licensing business, QTL, and the vast majority of our patent portfolio. Qualcomm Technologies, Inc., a subsidiary of Qualcomm Incorporated, operates, along with its subsidiaries, all of our engineering, research and development functions, and all of our products and services businesses, including, the QCT semiconductor business. For more information, visit Qualcomm's [website](#), [OnQ blog](#), [Twitter](#) and [Facebook](#) pages.
