

Capstone[®]

Turbine Corporation

Management Presentation

NASDAQ: CPST

**Reliable power when and where you need it.
Clean and simple.**

Safe Harbor

This presentation contains “forward-looking statements” regarding future events or financial performance of the Company, within the meaning of the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995.

These statements relate to, among other things, the competitive advantages of the Company’s products; global market verticals; achievement of the Company’s three-pronged business profitability plan, including: continued cost reductions, adoption of the Company’s Signature Series product and accessories offerings, and the success of Capstone Energy Finance; increasing revenues from: geographic and market diversification, Capstone Energy Finance, Aftermarket Service growth, the Sell-to-Win Program, FPP Contracts, new spare parts programs, spare parts price increases, and Signature Series upgrade kits; potential increase in revenue due to impact of recent hurricanes; attainment of the Company’s continuous improvement business initiatives, including: capitalizing on Capstone Energy Finance, cost reductions, increase CHP product sales, increase in FPP contract backlog, increase in spare parts revenue, closing out of the C200 reliability program, continuous and ongoing product development efforts, balance sheet management and cash burn minimization efforts; and achievement of Adjusted EBITDA breakeven and profitability.

Forward-looking statements may be identified by words such as “believe,” “expect,” “objective,” “intend,” “targeted,” “plan” and similar phrases.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties described in the Company’s Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and other periodic filings with the Securities and Exchange Commission that may cause the Company’s actual results to be materially different from any future results expressed or implied in such statements. Because of the risks and uncertainties, the Company cautions you not to place undue reliance on these statements, which speak only as of the date of this presentation. We undertake no obligation, and specifically disclaim any obligation, to release any revision to any forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect the occurrence of unanticipated events.

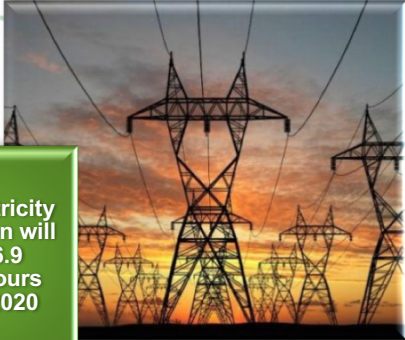

Distributed Generation Megatrend

Driven by attractive economics and resiliency, power users are increasingly searching for ways to reduce their dependence on grid power. Capstone can solve this problem by providing a highly reliable and efficient power source to solve power demand issues for users across numerous industries.

Annual distributed generation power additions will grow to 200 GW in 2020 from 150 GW currently

Global electricity consumption will rise to 26.9 terawatt-hours (Twh) by 2020

Microgrids account for 27 GW of current distributed generation

\$205 billion will be invested in global distributed power generation annually by 2020 - 42% of total power additions

65% of global electricity consumption will be located in emerging markets (Asia, Africa & Middle East) by 2020

Source: GE - Rise of Distributed Power - 2014

Capstone Has Competitive Advantage Over Incumbent Technology

What is a Microturbine?

CHP/TYPE	EFFICIENCY	
	ELECTRIC	TOTAL
Hot Water	33.0%	85.0%
Steam	33.0%	60.0-95.0%
Chilled Water	33.0%	85.0%

Competitive Advantages

Features

Benefits

Inverter based with one moving part

Factory guaranteed low operating costs

Patented air bearing technology

No lubricants or coolants needed - unmanned projects

Stand alone or grid connect

Supports aging utility infrastructure

Fuel availability

Operates on gaseous, renewable and liquid fuels

High power density

Compact footprint, small modular design

Low emissions

No exhaust aftertreatment

Free clean waste heat

Thermal energy for cogeneration/trigeneration

Remote monitoring

View performance and diagnostics 24/7

Scalable to match demand

Multiple applications and industries

Global Market Verticals

Energy Efficiency

Generate on-site power capture thermal energy from the clean exhaust in CHP and CCHP applications.

Hotels
Industrial Applications
Large Residential Complexes
Retail Buildings
Office Buildings

Oil, Gas & Other Natural Resources

Produce on-site power for all phases of oil and gas production in both onshore and offshore applications.

Drilling Operations
Flare Gas Reduction
Gas Compression
Mining
Water Conversion

Renewable Energy

Cleanly and efficiently generate onsite power operating on biogas and other waste products to create high-efficiency renewable power and heat.

Farm Digesters
Landfills
Solid Waste Management
Wastewater Treatment
Food Waste

Critical Power Supply

Mission critical businesses have an uninterruptible power source with the world's only microturbine-powered UPS solution.

Data Centers
Telecom
Power Rentals
Hospitals

Transportation

Operate in conjunction with battery packs to provide onboard battery charging and vehicle range extension.

Commercial Trucks
Heavy-duty Vehicles
Supercars
Transit Buses
Delivery Vehicles

Marine

Provide onboard power, vessel range extension and utilize thermal energy for onboard heating and cooling.

Work Boats
Cargo Ships
Commercial Vessels
Tour Boats

FY2017 Percentage of Product Shipments

59%

34%

Sample New York Installations

Energy Efficiency
Residential

Residential Complex
Bronx, New York

Natural gas-fueled combined heat and power (CHP) microturbine provides primary power and hot water to the multi-family residential complex.

(1) C1000 | DM*
1MW Electricity

Projected ROI: 3.5 yrs

Commissioned: 9/16

Energy Efficiency
Healthcare

Residential Healthcare
Wyckoff, New Jersey

Assisted living facility with 292-bed capacity. Four natural gas-fueled microturbines provide combined cooling, heat and power (CCHP) to residents.

(4) C65 | DM*
Absorption Chiller
260kW Electricity

Commissioned: 8/08

Energy Efficiency
Retail

Retail Wine Store
New York, New York

2011 AEE Energy Project winner. Exhaust heat from two microturbines is used to provide 40 tons of chilling year round.

(2) C65 ICHP | GC*
40-Ton Absorption Chiller
130kW Electricity
Projected ROI: 4 yrs

Commissioned: 12/05

Energy Efficiency
Hospitality

Luxury Hotel
New York, New York

Twelve integrated combined heat and power (ICHP) microturbine array supplies electricity and hot water to the building and also feeds an absorption chiller.

(12) C65 ICHP
200-Ton York Absorption Chiller
780kW Electricity
Projected ROI: 4.5 yrs

Commissioned: 10/13

Renewable Energy
Waste Water Treatment

WWTP
New York, New York

Two microturbines fueled by digester gas and natural gas blend provide power and heat to the waste water treatment plant (WWTP).

(2) C65 ICHP
130kW Electricity

Projected ROI: 6 yrs

Commissioned: 9/14

Energy Efficiency
Residential

Residential Complex
New York, New York

Four microturbines provide combined heat and power (CHP) to multi-family high rise building. Also feeds into an integrated heating loop for winter months.

(4) C65 ICHP | GC*
260kW Electricity

Projected ROI: 4 yrs

Commissioned: 12/10

*DM – Dual Mode System (Emergency backup power feature)

*GC – Grid Connect System

Case Studies can be found on www.capstoneturbine.com/case-studies

Projected ROI estimates are at time of sale

Sample North East Installations

Energy Efficiency
Healthcare

Hospital
Massachusetts

The C1000 system provides heat and power to the Boston-based hospital 24/7/365. The system will soon approach 40,000 run-time hours.

(1) C1000
1MW Electricity

Commissioned: 2011

Energy Efficiency
Technology

Software Company
Natick, Massachusetts

Four C65 systems power and cool the new headquarters/data center at this computer software company. System is under FPP through 2023.

(4) C65
260kW Electricity
100-Ton Absorption Chiller

Commissioned: 2014

Critical Power
Microgrid

Utility Software
Bloomington, Minnesota

A C600S system forms the backbone of the microgrid at their new headquarters and data center.

(1) C600S
600kW Electricity
200-Ton Absorption Chiller

Commissioned: 2017

Critical Power
Data Center

Data Center
Southfield, Michigan

Two C1000 power packages provide power and backup capacity to the growing data center.

(2) C1000 | PP*
2MW Electricity

Projected ROI: 3 yrs

Commissioned: 2016

Critical Power
Utility Power/Microgrid

Island Power
Off the Coast of Maine

Four liquid-fueled microturbines are the primary power source for the remote island. The technology was funded by the U.S. Government.

(4) C65
260kW Electricity

Commissioned: 2016

Renewable Energy
Dairy Plant

Food Processing
Franklin, Massachusetts

Ten combined heat and power (CHP) microturbines utilize digester gas from dairy processing as fuel and captures the hot water in order to heat the digester.

(10) C65
650kW Electricity

Commissioned: 2014

*PP – Prime Power

Projected ROI estimates are at time of sale

Capstone Strategic Profit Plan

Three-Pronged Capstone Business Profitability Plan

Reduce Breakeven from \$160M at 25% GM to \$100M at 20% GM

Action: Reduce business expenses 35% from Q1 FY16 levels.

Result: Achieved 42% reduction in operating expenses in Q3 FY17 from Q1 FY16. Dropped from \$10.5M to \$5.9M - which is a 14 year low.

Status: GOAL ACHIEVED

Comments: Management plans to focus on continued cost reductions and facility consolidation to achieve \$5.0M in quarterly OpEx.

Develop New CHP Focused Products & Accelerate Aftermarket Business

Action: Launch new product focused on Energy Efficiency Markets. Drive FPP and Warranty revenue growth.

Result: New Signature Series product in late 2015 and new FPP and Extended Warranty products. New "Sell-to-Win" bundled solutions program in 2017.

Status: GOAL ACHIEVED

Comments: New Signature Series is performing well in the field. FPP Backlog has grown 12% over the last 18 months to \$74.7M as of Q2 FY18.

Finance Solutions to Capture Orders that were Lost from Lack of Capital

Action: Develop a 30% JV with a high net worth individual to provide PPAs to customers who have lack of capital.

Result: Launched Capstone Energy Finance JV in late 2015 and developed \$60M in highly qualified projects. Signed initial project in 2017.

Status: GOAL ACHIEVED

Comments: Added Sky Solar for additional \$50M in capital beyond first \$10M. Initial PPAs anticipated accelerated PPAs in coming quarters.

Positive Impact of Hurricanes

- Overwhelming majority of our microturbine installations in Texas, Florida, Puerto Rico, Dominican Republic and the U.S. Virgin Islands not only survived the storms but were fully operational providing critical power and in some cases provided the power needed to pump water.
- Similar results in late October 2012 when Hurricane Sandy devastated the states of New York and New Jersey. An estimated 93, out of 95 microturbines, remained fully operational at that time.

Five years removed from Hurricane Sandy, RSP Systems, Capstone's distributor for the greater New York area, is a top five revenue producer worldwide.

Fully operational Capstone Microturbines on St. Thomas surrounded by debris from Hurricane Irma

On-site Distributed Generation Provides Money Savings, On-site Generation & Critical Emergency Backup Power

Previous, New and Future Quarterly Business Models

APPENDIX

Research & Development

Capstone Product Development Roadmap

Kenworth Hybrid Class 7 Demo

- Quantitative Emissions and Fuel Economy Measurements
 - ✓ Criteria Pollutants (NO_x, CO, PM, NMHCs)
 - ✓ Greenhouse Gas (CO₂)
 - ✓ Fuel Consumption (both charge sustaining & charge depleting basis)
 - ✓ Compare Results to Traditional Diesel Drivetrain
- Three Specific Drive Cycles
 - ✓ Urban and Rural Delivery
- Two Customer Demonstrations Planned:
 - ✓ LA Area for Urban Delivery Late 2017
 - ✓ San Joaquin Valley for Rural Delivery 2018

Kenworth Class 7 Track Testing

- Series Hybrid Design
 - ✓ 65kW Range Extender
 - ✓ 47kWh Li-Ion Battery Pack
 - ✓ 220kW Traction Motor
- CNG Fuel for Microturbine
- Level II On-board Plug-in Charging
- Regenerative Braking
- Main Advantage is in Stop & Go Delivery Applications

Why Trucks with Microturbines?

- Ultra-Low Emissions
 - ✓ Below CARB Levels
 - ✓ No Exhaust After Treatment
- Low Maintenance Requirements
 - ✓ No Oil Changes (Air Bearings)
 - ✓ No Engine Overhaul (Extended Life Design)
- Ability to Operate on Alternative Fuels
- Efficiency of a Diesel on Any Fuel
- Lightweight
- Essentially No Vibration
- Low Sound Levels

Capstone Energy Finance JV Initiative

- Now offering PPA, Lease, and Rentals
- Executed First Agreement – September 18, 2017
- In negotiation for several projects
- Projects cover wide variety of markets and applications
- Pipeline over \$60M (product only)
- Actively working with Sky Capital (subsidiary of Sky Solar Group) to provide up to \$150M in project financing
- Partnering with additional banks to broaden competitive lease rates

C200 Reliability Initiative

Continuous improvement of the baseline C200 Engine over the past four years:

- Improved combustion liner (2013)
- Improved air bearing coatings (2014)
- Improved bearing housings (2015)
- New high-flow impeller (2015)
- Improved recuperator manufacturing (2015)
- New stator/magnet combination (2016)
- New recuperator diffuser/nozzle sealing (2016)
- ***Extensive on-going product development, qualification and certification testing throughout (2013-2017)***

C200 Signature Series

**Retrofit Upgrade Program Has Been Completed –
On Schedule and Within Budget**

Reconciliation of Non-GAAP Financial Measure

Reconciliation of Reported Net Loss to Adjusted EBITDA	Three months ended September 30,		Six months ended September 30,	
	2017	2016	2017	2016
Net loss, as reported	\$ (3,667)	\$ (5,865)	\$ (7,760)	\$ (10,382)
Interest expense	98	129	319	263
Provision for income taxes	7	—	7	3
Depreciation and amortization	279	396	583	802
Stock-based compensation	154	241	307	479
Restructuring charges	219	—	219	—
Change in warrant valuation	657	—	657	—
Adjusted EBITDA	<u>\$ (2,253)</u>	<u>\$ (5,099)</u>	<u>\$ (5,668)</u>	<u>\$ (8,835)</u>

To supplement the Company's unaudited financial data presented on a generally accepted accounting principles (GAAP) basis, management has used Adjusted EBITDA, a non-GAAP measure. This non-GAAP measure is among the indicators management uses as a basis for evaluating the Company's financial performance as well as for forecasting future periods. Management establishes performance targets, annual budgets and makes operating decisions based in part upon these metrics. Accordingly, disclosure of this non-GAAP measure provides investors with the same information that management uses to understand the Company's economic performance year-over-year. The presentation of this additional information is not meant to be considered in isolation or as a substitute for net income or other measures prepared in accordance with GAAP.

Adjusted EBITDA is defined as net income before interest, provision for income taxes, depreciation and amortization expense, stock-based compensation expense, the change in warrant valuation and restructuring charges. Restructuring charges includes one-time costs related to our cost reduction initiatives. Adjusted EBITDA is not a measure of our liquidity or financial performance under GAAP and should not be considered as an alternative to net income or any other performance measure derived in accordance with GAAP, or as an alternative to cash flows from operating activities as a measure of our liquidity.

While management believes that the non-GAAP financial measures provide useful supplemental information to investors, there are limitations associated with the use of these measures. The measures are not prepared in accordance with GAAP and may not be directly comparable to similarly titled measures of other companies due to potential differences in the exact method of calculation. Management compensates for these limitations by relying primarily on our GAAP results and by using Adjusted EBITDA only supplementally and by reviewing the reconciliations of the non-GAAP financial measures to their most comparable GAAP financial measures.

Non-GAAP financial measures are not in accordance with, or an alternative for, generally accepted accounting principles in the United States. The Company's non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP financial measures, and should be read only in conjunction with the Company's consolidated financial statements prepared in accordance with GAAP.
