Capstone Green Energy Secures 3.6 MW EaaS Contract for a Large West Texas Oil Producer

EaaS Rental Units under Contract Hits 45 MW with a Plan to Reach 50 MW by March 31

Capstone Is Focused On Growing the EaaS Business Model as Quickly as Possible Because It Provides Higher Margins, More Constant and Predictable Revenue Streams

LOS ANGELES--(BUSINESS WIRE)-- [Capstone Green Energy Corporation](#) (NASDAQ: CGRN) a global leader in carbon reduction and on-site resilient green Energy-as-a-Service (EaaS) solutions, announced that its southern U.S. distributor, [Lone Star Power Solutions](#), has contracted with a large West Texas energy company to provide a new 3.6 MW EaaS rental contract pushing its total EaaS contracts to 45 MW.

Capstone Green Energy EaaS Contract Growth Chart (Graphic: Business Wire)

and is indicative of ongoing customer demand. The large West Texas energy producer will use the microturbine energy systems to power production loads using the on-site gas produced from its day-to-day operations.

The 3.6 MW of Capstone systems will replace traditional reciprocating engine generator rental units. Capstone Green Energy's EaaS solution was selected due to its proven track

The Company is confident in its ability to achieve sustained positive adjusted EBITDA results when it reaches its target of 50 MW - of deployed rental units, combined with its recent across-the-board price increase that went into effect on January 30, 2022. This new contract represents the continued expansion of the EaaS strategy

record of reliability in the oil and gas fields across the world and its extremely low emissions profile as the energy company looks to decarbonize its operations. Additionally, the customer will benefit from fixed operating costs for the duration of the rental since all maintenance is included in the contract, providing cost savings and added convenience.

“Our focus remains our EaaS rental business and the benefits it brings us, including higher margin rates and predictable revenues and cash flow while transitioning us away from being only a manufacturing company. The growth shows our customers both need and want this solution and that we can provide it, solving both our customer’s needs and driving returns for our shareholders,” stated Capstone Green Energy President and Chief Executive Officer Darren Jamison.

“Our overall financial goals are unchanged: we are focused on growing revenue and reaching positive Adjusted EBITDA on a sustainable basis. EaaS is a pivotal factor in achieving this goal in conjunction with our recent price increase and cost control initiatives. I am confident we will meet our strategic goal of 50 MW by March 31, 2023, as we continue to manage customer delivery dates and navigate the global supply chain challenges,” added Mr. Jamison.

About Capstone Green Energy

[Capstone Green Energy](#) (NASDAQ: CGRN) is a leading provider of customized microgrid solutions and on-site energy technology systems focused on helping customers around the globe meet their environmental, energy savings, and resiliency goals. Capstone Green Energy focuses on four key business lines. Through its Energy as a Service (EaaS) business, it offers rental solutions utilizing its microturbine energy systems and battery storage systems, comprehensive Factory Protection Plan (FPP) service contracts that guarantee life-cycle costs, as well as aftermarket parts. Energy Generation Technologies (EGT) are driven by the Company's industry-leading, highly efficient, low-emission, resilient microturbine energy systems offering scalable solutions in addition to a broad range of customer-tailored solutions, including hybrid energy systems and larger frame industrial turbines. The Energy Storage Solutions (ESS) business line designs and installs microgrid storage systems creating customized solutions using a combination of battery technologies and monitoring software. Through Hydrogen & Sustainable Products (H2S), Capstone Green Energy offers customers a variety of hydrogen products, including the Company's microturbine energy systems.

To date, Capstone has shipped over 10,000 units to 83 countries and estimates that in FY22, it saved customers over \$213 million in annual energy costs and approximately 388,000 tons of carbon. Total savings over the last four years are estimated to be approximately \$911 million in energy savings and approximately 1,503,100 tons of carbon savings.

For customers with limited capital or short-term needs, Capstone offers rental systems; for more information, contact: rentals@CGRNenergy.com.
