NeoGenomics to Present Key Research on Hematologic Malignancies at the 2024 American Society of Hematology Annual Meeting

The company will showcase new insights into CNS lymphoma, myeloid malignancies,and gene fusions in acute myeloid leukemia

FT. MYERS, Fla.--(BUSINESS WIRE)-- **NeoGenomics, Inc. (NASDAQ: NEO),** a leading oncology testing services company, will share its latest research on hematologic malignancies and the prognostic effects of microenvironment signatures in primary central nervous system (CNS) lymphoma at the 2024 American Society of Hematology (ASH) Annual Meeting, booth #2347, in San Diego, December 7-10. The company will also feature its robust hematological oncology solutions, including COMPASS, AML Express, and AML MRD Flow Panel.

“Our research at ASH demonstrates that NeoGenomics continues to advance its leadership position in precision diagnostics for hematologic cancers,” said Warren Stone, Chief Commercial Officer of NeoGenomics. “Through our collaboration with Duke University and the innovative work of our scientific team, we are uncovering critical insights into the genetic and microenvironmental factors that influence patient outcomes. These studies can potentially refine prognostic tools, align diagnostics with clinical guidelines, and ultimately improve therapeutic decision-making—enhancing care for patients battling blood cancer.”

At the meeting, NeoGenomics will present a poster:

- **Neuronal-Glial and Immune Microenvironment Signatures Show Prognostic Effects in Primary CNS Lymphoma**
    - Monday, December 9 at 6-8 p.m. PST
    - This study explores the prognostic effects of neuronal-glial and immune microenvironment signatures in primary central nervous system lymphoma. Through advanced multiplexing techniques, researchers have identified distinct microenvironment patterns with potential implications for predicting patient outcomes.

In addition to the poster, NeoGenomics’ two abstracts were recently published in the *Blood* supplement and archived on the ASH and *Blood* abstracts site:

- **Genetic Insights into Myeloid Malignancies: A Comparative Analysis of NCCN Guidelines, the WHO Classification, and the ICC System**

    - This study offers a comprehensive analysis of genetic insights into myeloid malignancies, comparing recommendations from major clinical guidelines and classifications, including the NCCN, WHO, and ICC systems.
- **A Prevalence Study of Gene Fusions in 2,958 Acute Myeloid Leukemia Patients from the Community Using FISH and NGS Testing**
    - This prevalence study evaluates gene fusion occurrences in nearly 3,000 AML patients from community settings and utilizes FISH and NGS testing to uncover critical insights for diagnostic and therapeutic decision-making.

About NeoGenomics, Inc.

NeoGenomics, Inc. specializes in cancer genetics testing and information services, providing one of the most comprehensive oncology-focused testing menus for physicians to help them diagnose and treat cancer. The Company's Advanced Diagnostic Division also serves pharmaceutical clients in clinical trials and drug development.

Headquartered in Fort Myers, FL, NeoGenomics operates CAP accredited and CLIA certified laboratories for full-service sample processing in Fort Myers, Florida; Aliso Viejo and San Diego, California; Research Triangle Park, North Carolina; and Houston, Texas; and a CAP accredited full-service, sample-processing laboratory in Cambridge, United Kingdom. NeoGenomics also has several, small, non-processing laboratory locations across the United States for providing analysis services. NeoGenomics serves the needs of pathologists, oncologists, academic centers, hospital systems, pharmaceutical firms, integrated service delivery networks, and managed care organizations throughout the United States, and pharmaceutical firms in Europe and Asia.

Forward-Looking Statements

This press release includes forward-looking statements. These forward-looking statements generally can be identified by the use of words such as "anticipate," "expect," "plan," "could," "would," "may," "will," "believe," "estimate," "forecast," "goal," "project," "guidance," "plan," "potential" and other words of similar meaning, although not all forward-looking statements include these words. This press release includes forward-looking statements. These forward-looking statements address various matters, including statements regarding improving operational efficiency, returning to profitable growth and its ongoing executive recruitment process. Each forward-looking statement contained in this press release is subject to a number of risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statement. Applicable risks and uncertainties include, among others, the Company's ability to identify and implement appropriate financial and operational initiatives to improve performance, to identify and recruit executive candidates, to continue gaining new customers, offer new types of tests, integrate its acquisitions and otherwise implement its business plan, and the risks identified under the heading "Risk Factors" contained in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and the Company's other filings with the Securities and Exchange Commission.

We caution investors not to place undue reliance on the forward-looking statements contained in this press release. You are encouraged to read our filings with the SEC, available at www.sec.gov, for a discussion of these and other risks and uncertainties. The forward-looking statements in this press release speak only as of the date of this document (unless another date is indicated), and we undertake no obligation to update or revise any of these statements. Our business is subject to substantial risks and uncertainties, including those referenced above. Investors, potential investors, and others should give careful consideration to these risks and uncertainties.
