ProMIS Neurosciences to Participate in NobleCon15 and CanTech Investment Conferences

Company to showcase its innovative Alzheimer's, Parkinson's and ALS programs

TORONTO and CAMBRIDGE, MA, Jan. 17, 2019 /PRNewswire/ - ProMIS Neurosciences, Inc. (TSX: PMN) (OTCQB: ARFXF), a biotechnology company focused on the discovery and development of antibody therapeutics selectively targeting toxic oligomers implicated in the development of neurodegenerative diseases, announced that it will participate in the NobleCon15 and the Cantech Investment Conferences. Members of ProMIS' senior management will provide overviews of its novel drug discovery and development programs for Alzheimer's disease, Parkinson's disease and ALS (amyotrophic lateral sclerosis), and participate on discussion panels.

NobleCon15 Investor Conference - Eugene Williams, ProMIS' Executive Chairman will present the company to investors on Monday, January 28, 2019 at 2:30pm, EST, at the W Hotel, Fort Lauderdale, Florida. In addition, James Kupiec, MD, ProMIS' Chief Medical Officer will participate on a panel titled *Researching the Cause of Alzheimer's Disease – Quest for a Cure* at 5:30pm EST on Monday, January 28, 2019.

A high definition, video webcast of the Mr. Williams' presentation will be available the following day on the Company's web site www.promiseneurosciences.com, and on Noble Capital Markets' websites: www.noblecapitalmarkets.com, and www.nobleconference.com. The webcast and presentation will be archived on the company's website and on the Noble websites for 90 days following the event.

CanTech Investment Conference – Dr. Elliot Goldstein, ProMIS' President and CEO will participate on a panel titled *Biotech Solutions to a Neurodegenerative Crisis*, on Tuesday, January 29, 2019 at 1:30pm EST. Following the panel discussion, Dr. Goldstein will present the company to investors at 2:40pm, EST. The conference is being held at the Metro Toronto Convention Centre, Toronto, Ontario.

About ProMIS' Platform Technology

Numerous studies show that a common root cause of neurodegenerative diseases is the toxic oligomer, a misfolded protein that derives from naturally occurring proteins in the brain. Using its novel drug discovery platform, ProMIS can uniquely and selectively target the toxic oligomer, filling a critical gap for drug developers as traditional approaches to developing antibodies are unable to isolate and target the toxic oligomer with adequate precision. This proprietary platform can identify targets to produce, test and advance antibody candidates quickly and cost-effectively. ProMIS' lead candidate antibody, PMN310 for Alzheimer's disease, demonstrates a high degree of binding to toxic oligomers without binding to non-toxic forms of naturally occurring amyloid beta protein. The company's program for Parkinson's disease is based on the development of several potential antibody therapeutic candidates aimed at selectively targeting toxic oligomers of the protein α -synuclein, considered a root cause of Parkinson's disease. Similarly, ProMIS has identified antibody candidates selectively targeting toxic oligomers of the protein TDP43, considered a root cause of ALS.

About ProMIS Neurosciences

ProMIS Neurosciences, Inc. is a development stage biotechnology company focused on discovering and developing antibody therapeutics selectively targeting toxic oligomers implicated in the development and progression of neurodegenerative diseases, in particular Alzheimer's disease (AD), amyotrophic lateral sclerosis (ALS) and Parkinson's disease (PD). The Company's proprietary target discovery engine is based on the use of two complementary techniques. The Company applies its thermodynamic, computational discovery platform -ProMIS and Collective Coordinates – to predict novel targets known as Disease Specific Epitopes on the molecular surface of misfolded proteins. Using this unique precision medicine approach, the Company is developing novel antibody therapeutics for AD, ALS and PD. ProMIS is headquartered in Toronto, Ontario, with offices in Cambridge, Massachusetts. ProMIS is listed on the Toronto Stock Exchange under the symbol PMN, and on the OTCQB Venture Market under the symbol ARFXF.
