

Investment Objective

The investment objective of the Palmer Square Credit Opportunities is to seek high level of current income. A secondary objective of the ETF is to seek long-term capital appreciation.

Strategy Overview

Exposure to Palmer Square Expertise in Opportunistic Credit

- Designed to be an opportunistic, high quality, fixed income fund with solid yield and total return potential
- Flexible, actively managed approach that invests across corporate credit and structured credit
- Managers utilize a rigorous multi-step fundamental process to manage credit risk
- Senior members of Palmer Square's Investment Team average 20 years of credit investing experience

What Makes the Palmer Square Credit Opportunities ETF Distinct?

- Access to a flexible approach which invests in actively managed portfolio of high-quality bonds across corporates, asset-backed securities, and CLOs
- Expanded set of credit opportunities coupled with low interest rate duration bias provides diversification potential for fixed income portfolios
- Low spread duration positioning should lessen susceptibility to spread widening risk and volatility, while still maintaining solid yield potential

Notes and Disclosures

Interest Rate Duration measures a portfolio's sensitivity to changes in interest rates. The longer a security's duration, the more sensitive its price will be to changes in interest rates. **Spread Duration** measures a portfolio's sensitivity to changes in spreads and is the percentage price change of a bond's price given a 1% change in the yield spread. **Current Yield** is a weighted calculation of the annual coupon rate divided by the price of each individual security within the portfolio and represents the return an investor would expect if the securities were held for a year and the price did not change. **Yield To Maturity** is the rate of return anticipated on a bond if held until the end of its lifetime. **30-Day SEC Yield** represents net investment income earned by the Fund over the 30-day period, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period. The **subsidized SEC yield** is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and includes the effect of any fee waivers. Without waivers, yields would be reduced. The **unsubsidized SEC yield** is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and does not reflect waivers in effect. **Weighted average price** calculated by adding up the dollars traded and dividing by the total shares traded.

The allocation and credit quality distribution figures shown are used for illustrative purposes only. Palmer Square does not guarantee to execute that allocation and credit quality distribution. Allocation and exposures information, as well as other referenced categorizations, reflect classifications determined by Palmer Square as well as certain Palmer Square assumptions based on estimated portfolio characteristic information. Allocation and credit quality distribution figures may not sum to 100%. Ratings listed herein are assigned by Standard & Poor's (S&P) and Moody's Investor Service (Moody's). Credit quality ratings are measured on a scale with S&P's credit quality ratings ranging from AAA (highest) to D (lowest) and Moody's credit quality ratings ranging from Aaa (highest) to C (lowest). We use the higher of the two ratings. The credit quality distribution figures do not include unrated by Moody's, S&P, or Fitch, or another Nationally Recognized Statistical Rating Organization. Credit ratings listed are subject to change. Please contact Palmer Square for more information.

With regard to sources of information, certain of the economic and market information contained herein has been obtained from published sources and/or prepared by third parties. While such sources are believed to be reliable, Palmer Square or their respective affiliates, employees, or representatives do not assume any responsibility for the accuracy of such information. Palmer Square is under no obligation to verify its accuracy.

The Bloomberg U.S. 1-3 Year Corporate Bond Index is an unmanaged index that is designed to measure the performance of the short-term U.S. corporate bond market. The Index includes publicly issued US dollar denominated corporate issues that have a remaining maturity of greater than or equal to 1 year and less than 3 years, are rated investment grade (must be Baa3/BBB- or higher using the middle rating of Moody's Investor Service, Inc., Standard & Poor's, and Fitch Rating), and have \$250 million or more of outstanding face value. Unlike mutual funds, indices are not managed and do not incur fees or expenses. It is not possible to invest directly in an index.

Different types of investments involve varying degrees of risk and there can be no assurance that any specific investment will be profitable. Please note that the performance of the funds may not be comparable to the performance of any index shown. Palmer Square has not verified, and is under no obligation to verify, the accuracy of index returns. Past performance does not guarantee future results.

The Fund is subject to liquidity risk and therefore may not be able to sell some or all of the investments that it holds due to a lack of demand in the marketplace or other factors. The Fund is subject to credit risk in that if an issuer or guarantor of a debt security held by the Fund or a counterparty to a financial contract with the Fund defaults or is downgraded or is perceived to be less creditworthy, or if the value of the assets underlying a security declines, the value of the Fund's portfolio will typically decline. The Fund is classified as "non-diversified," which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Fund to greater market risk and potential losses than if its assets were diversified. High yield securities, commonly referred to as "junk bonds", are rated below investment grade by at least one of Moody's, S&P or Fitch (or if unrated, determined by the Fund's advisor to be of comparable credit quality high yield securities). High yield funds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter-term and higher rated securities. Using derivatives exposes the Fund to additional or heightened risks, including leverage risk, liquidity risk, valuation risk, market risk, counterparty risk, and credit risk. Derivatives transactions can be highly illiquid and difficult to unwind or value and they can increase Fund volatility.
