

Energy Recovery Reports Fourth Quarter and Fiscal Year End 2019 Financial Results

SAN LEANDRO, CA / ACCESSWIRE / March 5, 2020 /Energy Recovery Inc. (Nasdaq:ERII) ("Energy Recovery," "we," "our," or the "Company"), a leader in pressure energy technology for industrial fluid flows, today announced its financial results for the fourth quarter and fiscal year ended December 31, 2019.

Fiscal Year 2019 Highlights:

- Total product revenue of \$72.8 million, an increase of 19% year-over-year
- Total revenue of \$86.9 million, an increase of 17% year-over-year
- Product gross margin of 72.1%, an increase of 140 basis points year-over-year
- Income from operations of \$10.4 million, an increase of 4% year-over-year
- Net income of \$10.9 million, or diluted earnings per share of \$0.19, a decrease of \$0.21 year-over-year due to a tax benefit of \$11.2 million recognized in 2018
- Adjusted net income⁽¹⁾ of \$9.9 million, or non-GAAP diluted earnings per share⁽¹⁾ of \$0.18, a decrease of \$0.02 year-over-year

Chairman and Interim President and Chief Executive Officer Robert Mao remarked, "2019 was a year of new highs for Energy Recovery. In our water business, we achieved our third consecutive year of record-setting revenues, we signed our largest-ever desalination project contract, and we enter 2020 with a high degree of confidence based on closed deals that are expected to ship over the next two years. In addition, we executed our largest to date contract for a thermal to seawater reverse osmosis ("SWRO") desalination replacement project. Thanks to technologies such as our PX® Pressure Exchanger®, SWRO is now much more cost-effective than thermal, encouraging thermal plant owners and operators to replace thermal with SWRO technologies. We estimate this potential TAM to be approximately half a billion dollars at today's prices and are focused on capturing as much of this opportunity as possible over the coming decade."

Mr. Mao continued, "The ability to test continually while iterating design enhancements all in our own facility in Katy, Texas has allowed us to improve the VorTeq's reliability and repeatability. Our ability to process sand in volumes and concentrations used in today's hydraulic fracturing environment gives me confidence that our testing protocol is working. We intend to continue testing the system in preparation for commercialization, which will include live well testing."

Mr. Mao concluded, "While the Company's near-term priorities remain water business growth and VorTeq commercialization, we also made strides in 2019 implementing a structure that will enable a disciplined approach to longer-term growth. I firmly believe Energy Recovery enters this new decade with the right elements in place for continued success."

Fiscal Year 2019

Revenues

For the year ended December 31, 2019, the Company generated total revenue of \$86.9 million, an increase of \$12.4 million, or 17%, compared to \$74.5 million for the year ended December 31, 2018. This increase was due primarily to Water segment growth.

The Water segment generated total product revenue of \$72.7 million for the year ended December 31, 2019, an increase of \$12.2 million, or 20%, compared to \$60.5 million for the year ended December 31, 2018. This significant increase was due primarily to the growth in our Mega-Project Development ("MPD") channel.

The Oil & Gas segment generated total revenue of \$14.2 million for the year ended December 31, 2019, an increase of \$0.2 million, or 1%, compared to \$14.0 million for the year ended December 31, 2018, due primarily to an increase in license and development revenue, which is calculated as a percentage of Cost to Total Cost.

Product Gross Margin

For the year ended December 31, 2019, product gross margin was 72.1%, an increase of 140 basis points from 70.7% for the year ended December 31, 2018. This increase was due primarily to higher volume of products sold, favorable product mix, manufacturing equipment upgrades and process improvements.

Operating Expenses

For the year ended December 31, 2019, operating expenses were \$56.2 million, an increase of \$9.6 million, or 21%, compared to \$46.7 million for the year ended December 31, 2018. This increase was due primarily to the Company's continued investment in research and development in both the Oil & Gas and Water segment, as well as growth in headcount and personnel-related costs.

Bottom Line Summary

To summarize the Company's financial performance, on an annual basis, the Company reported a net income of \$10.9 million, or \$0.19 per diluted share, for the year ended December 31, 2019, compared to a net income of \$22.1 million, or \$0.40 per diluted share, for the year ended December 31, 2018. This decrease was due primarily to a discrete tax benefit of \$11.2 million related to the reversal of a non-recurring tax benefit for the year ended December 31, 2018, partially offset by \$1.0 million related to an increase in prior years U.S. federal research and development credits for the year ended December 31, 2019. On an adjusted basis, excluding the discrete tax benefit, the Company reported an adjusted net income⁽¹⁾ of \$9.9 million, or \$0.18 per non-GAAP diluted share, for the year ended December 31, 2019.

Fourth Quarter 2019

Revenues

For the fourth quarter ended December 31, 2019, the Company generated total revenue of \$19.5 million, an increase of \$1.8 million, or 10%, compared to \$17.7 million in the fourth quarter ended December 31, 2018.

The Water segment generated total product revenue of \$15.8 million for the fourth quarter ended December 31, 2019, an increase of \$1.9 million, or 14%, compared to \$13.9 million for the fourth quarter ended December 31, 2018. This increase was due primarily to higher MPD shipments.

The Oil & Gas segment generated total revenue of \$3.7 million for the fourth quarter ended December 31, 2019, a decrease of \$0.1 million, or (3%), compared to \$3.8 million for the fourth quarter ended December 31, 2018. The decrease in revenue was due primarily to no product revenue recognized for the Oil & Gas segment for the fourth quarter ended December 31, 2019.

Product Gross Margin

For the fourth quarter ended December 31, 2019, product gross margin was 71.5%, a decrease of 300 basis points from 74.5% in the fourth quarter ended December 31, 2018. This decrease was due primarily to a change in the product mix.

Operating Expenses

For the fourth quarter ended December 31, 2019, GAAP operating expenses were \$15.9 million, an increase of \$3.2 million, or 25%, compared to \$12.7 million for the fourth quarter ended December 31, 2018. This increase was due primarily to the Company's continued investment in research and development in both the Oil & Gas and Water segment, as well as growth in headcount and personnel-related costs.

Bottom Line Summary

To summarize the Company's financial performance, on a quarterly basis, the Company reported a GAAP net loss of \$0.6 million, or (\$0.01) per diluted share for the fourth quarter ended December 31, 2019, compared to a net income of \$2.4 million, or \$0.04 per diluted share for the fourth quarter ended December 31, 2018.

Cash Flow Highlights

The Company finished the year ended December 31, 2019 with cash and cash equivalents of \$26.4 million, and short-term and long-term investments of \$74.2 million, which represents a combined total of \$100.5 million.

Forward-Looking Statements

Certain matters discussed in this press release and on the conference call are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including the Company's optimism for the long-term health of our Water business, the Company's belief that SWRO is more cost effective than thermal technologies, the Company's belief that thermal plant owners and operators are encouraged to convert to SWRO technologies, the Company's belief that potential thermal to SWRO conversions represent a half-billion dollar addressable market, the Company's intention to continue testing the VorTeq system in preparation for commercialization, including live well testing, the Company's belief that the Company will successfully commercialize the VorTeq system, and the Company's belief that our business will continue to grow over the next several years. These forward-looking

statements are based on information currently available to us and on management's beliefs, assumptions, estimates, or projections and are not guarantees of future events or results. Potential risks and uncertainties include the Company's ability to achieve the milestones under the VorTeq license agreement, any other factors that may have been discussed herein regarding the risks and uncertainties of the Company's business, and the risks discussed under "Risk Factors" in the Company's Form 10-K filed with the U.S. Securities and Exchange Commission ("SEC") for the year ended December 31, 2019 as well as other reports filed by the Company with the SEC from time to time. Because such forward-looking statements involve risks and uncertainties, the Company's actual results may differ materially from the predictions in these forward-looking statements. All forward-looking statements are made as of today, and the Company assumes no obligation to update such statements.

Use of Non-GAAP Financial Measures

This press release includes certain non-GAAP financial measures, including total gross margin, adjusted net income and non-GAAP earnings per share. Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that either exclude or include amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with generally accepted accounting principles in the United States of America, or GAAP. These non-GAAP financial measures do not reflect a comprehensive system of accounting, differ from GAAP measures with the same captions, and may differ from non-GAAP financial measures with the same or similar captions that are used by other companies. As such, these non-GAAP measures should be considered as a supplement to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. The Company uses these non-GAAP financial measures to analyze its operating performance and future prospects, develop internal budgets and financial goals, and to facilitate period-to-period comparisons. The Company believes these non-GAAP financial measures reflect an additional way of viewing aspects of its operations that, when viewed with its GAAP results, provide a more complete understanding of factors and trends affecting its business.

(1) "Total revenue," "Total gross margin," "Adjusted net income" and "Non-GAAP diluted earnings per share" are non-GAAP financial measures. Please refer to the discussion under headings "Use of Non-GAAP Financial Measures" and "Reconciliations of Non-GAAP Financial Measures."

Conference Call to Discuss Fourth Quarter and Fiscal Year End 2019 Financial Results

LIVE CONFERENCE CALL:

Thursday, March 5, 2020, 2:00 PM PST / 5:00 PM EST

Listen-only, US / Canada Toll-Free: +1 (877) 709-8150

Listen-only, Local / International Toll: +1 (201) 689-8354

Access code: 13698251

CONFERENCE CALL REPLAY:

Expiration: Saturday, April 4, 2020

US / Canada Toll-Free: +1 (877) 660-6853

Local / International Toll: +1 (201) 612-7415

Access code: 13698251

Investors may also access the live call or the replay over the internet at ir.energyrecovery.com. The replay will be available approximately three hours after the live call concludes.

About Energy Recovery Inc.

For more than 20 years, Energy Recovery, Inc. (NASDAQ: ERII) has created technologies that solve complex challenges in industrial fluid-flow markets. We design and manufacture solutions that reduce waste, improve operational efficiencies, and lower the production costs of clean water and oil and gas. What began as a game-changing invention for water desalination has grown into a global business delivering solutions that enable more affordable access to these critical resources. Both our headquarters in San Leandro, California, and our Commercial Development Center in Katy, Texas house on-site research, development and manufacturing facilities. In addition, our worldwide sales and technical service organization provides on-site support for our line of water solutions. For more information, please visit www.energyrecovery.com.

RECONCILIATION OF NON-GAAP FINANCIAL MEASURES
(Unaudited)

This press release includes non-GAAP financial information because we plan and manage our business using such information. Our non-GAAP Total Gross Margin is determined by adding back the license and development revenue associated with the amortization of the VorTeq exclusivity fee. Our non-GAAP adjusted net income or loss and non-GAAP diluted earnings per share is determined by adding back non-recurring operating and tax expenses/(benefits).
