

Summit Wireless Technologies Provides Fourth Quarter Update

- WiSA Designs Expands in All Categories (TVs, Speakers, Transmitters) and Positions to Support Increasing Home Theater Usage -

SAN JOSE, Calif.--(BUSINESS WIRE)-- [Summit Wireless](#) Technologies, Inc. (NASDAQ: WISA), a leading provider of immersive, wireless sound technology for intelligent devices and next-generation home entertainment systems and founding member of the WiSA Association, provided an update for the fourth quarter ended December 31, 2019.

“Consumer preference for wireless technology is continuing to drive our market opportunity. In response, WiSA members, including a new TV partner and multiple new speaker partners, are designing 14 new projects with most of them targeted for launch by the end of Q3 this year,” said Brett Moyer, CEO of Summit Wireless. “This WiSA ReadyTM* and WiSA CertifiedTM product progress builds upon our successful 2019 holiday season with worldwide retail rollouts and our strong 2020 CES with multiple launches from TV and speaker brands. As projected, we are now actively engaged with four TV brands, including LG Electronics’ OLED and NanoCell WiSA Ready TVs and Sharp’s WiSA Ready speakerless 8K resolution TVs that require accompanying WiSA enabled speakers. Additionally, two ODMs, Hansong and Tonewinner, are developing HDMI dongles for the broader smart TV market. They will support the installed base of 800 million smart TVs with HDMI ARC/eARC.”

WiSA members are investing marketing resources to promote WiSA as a standard and their related products. During Q1 2020, consumer interest grew sequentially, and approximately 40% of the unique individuals who visited wisaassociation.org clicked through to members’ “Buy Now” or “Learn More” links. Members are designing landing pages to take advantage of these engaged customers, promote their products and capture more of the recent increase home theater usage.

In preparing to build the next stage of Summit’s technology expansion, the company appointed Rob Tobias, CEO of HDMI Licensing Administrator, Inc., to the Summit Wireless board. Tobias’ strong relationships with top brands in Asia and his experience managing licensing programs for HDMI technology will be helpful as Summit builds a global brand trusted by both brands and consumers for wireless immersive sound.

“In March, we raised \$1.7 million in gross proceeds. We continue to actively evaluate additional funding options, including a variety of financing alternatives, investment options with a multitude of strategic partners and COVID-19 government loans. To date, we have not seen major impact to project timelines or securing retail placement of our customers’ products beyond a nominal 4 weeks to 8 weeks. Nonetheless, the company has initiated expense and temporary salary reductions that are expected to result in up to \$1 million of cost savings in Q2 2020 compared to Q4 2019 and strengthen our financial position,”

concluded Moyer.

Recent Highlights
