14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶

**On March 5, 2021, pursuant to the Indenture dated January 22, 2018 (the "Indenture"), the Conversion Rate of the 1% Convertible Senior Notes Due 2023 (the "Notes") was adjusted pursuant to Article 14 of the Indenture as a result of Patrick Industries, Inc.'s (the "Company") declaration and payment of a cash dividend of \$0.25 per share to the Company's shareholders, with ex-dividend date of August 28, 2020, as well as declaration and payment of cash dividends of \$0.28 per share, with ex-dividend dates of November 27, 2020 and March 5, 2021. The Company elected to defer adjustments of the Conversion Rate pursuant to the terms of the Indenture until the adjustment would require an increase of at least 1% in the Conversion Rate, which occurred effective March 5, 2021. The Conversion Rate was adjusted from 11.5438 shares of common stock per \$1,000 principal amount of Notes to 11.6839 shares of common stock per \$1,000 principal amount of Notes.**

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶

**The Company expects the conversion rate adjustment to be treated for U.S. federal income tax purposes as a deemed distribution under Code Section 305(c) as a result of such adjustment compensating the holder for cash distributed to shareholders that are taxable under CODE Section 301. The amount of the deemed distribution was calculated to be \$11.3439 per \$1,000 principal amount of Notes as shown below in Part II, Box 16.**

**The distribution is expected to be made from the earnings and profits of the Company. As such, the dividend of \$11.3439 per \$1000 principal amount of Notes should increase the holder's basis by the amount of the distribution.**

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶

**A=Ending Conversion Rate, 11.6839 B=Beginning Conversion Rate, 11.5438 C=PATK closing stock price at 3/4/21, \$80.97**

**(A-B)\*C=\$11.3439**

**Part II Organizational Action** (continued)
