Pro Forma Presentation

The pro forma information (“Pro Forma Information”) presented herein is not necessarily indicative of the operating results or financial condition that would have been achieved if the proposed acquisitions to which the Pro Forma Information relates had been completed on the dates or for the periods presented, nor do they purport to project the results of operations or financial position of the combined entities for any future period or as of any future date. Actual amounts recorded upon consummation of the acquisitions to which the Pro Forma Information relates would likely differ from those recorded in the Pro Forma Information. The Pro Forma Information does not reflect any special items such as integration costs or operating synergies that may be realized as a result of the acquisitions to which the Pro Forma Information relates.

Non-IFRS Financial and Performance Measures

In addition to providing financial measurements based on International Financial Reporting Standards (“IFRS”), the Company provides additional financial metrics that are not prepared in accordance with IFRS. Management uses non-IFRS financial measures, in addition to IFRS financial measures, to understand and compare operating results across accounting periods, for financial and operational decision making, for planning and forecasting purposes and to evaluate the Company’s financial performance. These non-IFRS financial measures are Adjusted EBITDA and Pro Forma Adjusted EBITDA.

Management believes that these non-IFRS financial measures reflect the Company’s ongoing business in a manner that allows for meaningful comparisons and analysis of trends in the business, as they facilitate comparing financial results across accounting periods and to those of peer companies. Management also believes that these non-IFRS financial measures enable investors to evaluate the Company’s operating results and future prospects in the same manner as management. These non-IFRS financial measures may also exclude expenses and gains that may be unusual in nature, infrequent or not reflective of the Company’s ongoing operating results.

As there are no standardized methods of calculating these non-IFRS measures, the Company’s methods may differ from those used by others, and accordingly, the use of these measures may not be directly comparable to similarly titled measures used by others. Accordingly, these non-IFRS measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.

EBITDA and Adjusted EBITDA

Adjusted EBITDA and Pro Forma Adjusted EBITDA are financial measures that are not defined under IFRS. The Company uses these non-IFRS financial measures, and believes they enhance an investor’s understanding of the Company’s financial and operating performance from period to period, because they excludes certain material non-cash items and certain other adjustments management believes are not reflective of the Company’s ongoing operations and performance. The Company calculates EBITDA as net income (loss), plus (minus) income taxes (recovery), plus (minus) interest expense (income), plus depreciation and amortization expense. Adjusted EBITDA excludes certain one-time non-operating expenses, as determined by management, including stock compensation expense,

goodwill impairment, loss (gain) on disposal of asset and business combination expense.

Reconciliations of Non-IFRS Financial and Performance Measures

Adjusted EBITDA is reconciled to Net Loss in the Management Discussion and Analysis of the Company for the quarter ended on March 31, 2019, which is available on the Company's SEDAR profile at www.sedar.com. Pro Forma Adjusted EBITDA is reconciled to Net Loss in the table that follows:
