Non-GAAP Financial Measures

Adjusted EBITDA, a non-GAAP financial measure, is computed by adding depreciation and amortization, stock-based compensation expenses, and restructuring and acquisition-related charges to GAAP income from operations.

This non-GAAP financial measure may have limitations as an analytical tool, and this measure should not be considered in isolation or as a substitute for analysis of results as reported under GAAP. The Company believes that adjusted EBITDA provides additional analytical information on the nature of ongoing operations excluding expenses not expected to recur in future periods, non-cash charges and variations in the effective tax rate among periods. For example, the Company believes that adjusted EBITDA is useful to investors because it provides a measure of operating performance and its ability to generate cash that is unaffected by non-cash accounting measures and non-recurring expenses. However, due to these limitations, the Company uses adjusted EBITDA as a measure of performance only in conjunction with GAAP measures of performance such as income from operations and net income. Reconciliations of this non-GAAP measure to its most comparable GAAP measure are included below.

Cash Dividends

On September 14, 2018, the Company paid its 61st consecutive quarterly cash dividend to shareholders, in the amount of \$0.12 per share.
