Oculus Innovative Sciences to Present at the Merriman Curhan Ford 5th Annual Investor Summit on September 15

PETALUMA, Calif.--(BUSINESS WIRE)--

Oculus Innovative Sciences, Inc. (Nasdaq: OCLS), a biopharmaceutical company that develops, manufactures and markets a family of products based upon the Microcyn(R) Technology platform, today announced that it will present at the Merriman Curhan Ford 5th Annual Investor Summit 2008 to be held in San Francisco, September 15-16 at the Mark Hopkins InterContinental Hotel.

Hoji Alimi, Oculus' founder and chief executive officer, is scheduled to speak on Monday, September 15, 2008 at 3:30 p.m. PT (6:30 p.m. ET) and will discuss the company's strategic initiatives, commercial activities, product pipeline and market opportunities.

Interested parties can access a live audio/video webcast and slide presentation at <http://www.wsw.com/webcast/mcm10/ocls/>. An archived presentation will be available at www.oculusis.com for 30 days.

About Oculus

Oculus Innovative Sciences is a biopharmaceutical company that develops, manufactures and markets a family of products based upon the Microcyn Technology platform, which is intended to help prevent and treat infections in chronic and acute wounds. The Microcyn Technology platform is a biocompatible, shelf-stable solution containing active oxychlorine compounds that is currently commercialized outside the United States (Europe, India and Mexico) for the treatment of infected wounds. The solutions derived from the Microcyn Technology platform have demonstrated, in a variety of research and investigational studies, the ability to treat a wide range of pathogens, including antibiotic-resistant strains of bacteria (including MRSA and VRE), viruses, fungi and spores. A recently completed U.S. Phase II clinical trial of Microcyn Technology met the primary endpoints of safety and efficacy for the treatment of mildly infected diabetic foot ulcers.

In addition to the company's existing and under-development therapeutic products, Oculus also develops, manufactures and markets a number of 510k devices and products for both professional and consumer. Oculus' principal operations are in Petaluma, California, and it conducts operations in Europe, Latin America and Japan. More information can be found at the company's web site, www.oculusis.com.
