Sonoma Pharmaceuticals and MicroSafe Group Announce That Microsafe® Disinfectant & Sanitizer Manufactured Using Sonoma's Microcyn® Technology Successfully Passed Material Compatibility Testing for Both Airbus and Boeing Commercial Transport Aircraft

WOODSTOCK, Ga.--(BUSINESS WIRE)-- Sonoma Pharmaceuticals, Inc. (Nasdaq: SNOA), a global healthcare leader developing and producing stabilized hypochlorous acid (HOCl) products for a wide range of applications, including wound care, eye care and dermatological conditions and the MicroSafe Group Dubai announce that Microsafe® Disinfectant & Sanitizer manufactured by Sonoma successfully passed both the Boeing Specification Standard BSS7434 and the British Aerospace Airbus specification AIMS09-00-002. The passing of these tests validate the compatibility and safety of the Microsafe® Disinfectant & Sanitizer on the interior and exterior parts and materials of Boeing and Airbus commercial transport aircraft.

“Conforming with the material compatibility standards set forth by Boeing & Airbus, together with our 30 second kill time of bacteria & viruses on hard surfaces, allows us to advance the use of Microsafe® Disinfectant & Sanitizer into the airline industry. Recently, Microsafe® Disinfectant & Sanitizer (brand name “Nanocyn” in Australia) was approved and entered into the Australian Register of Therapeutic Goods (ARTG) for use against SARS-CoV-2 (COVID-19) with a 30 second kill time,” said Mrs. Safa Qadumi, Founder and CEO of the MicroSafe Group Dubai.

“It’s important to note, that the Microsafe® Disinfectant & Sanitizer has been successfully used for nearly 20 years globally to fight the spread of infectious disease and during this time, we have earned numerous global regulatory approvals and amassed reputable scientific evidence not only as a surface disinfectant, but as a skin and wound antiseptic as well,” Mrs. Safa, continued.

“We are excited that these tests show that use of our Microcyn® technology conforms to aircraft manufacturer standards. These test results expand our potential sales channels into the airline industry,” said Amy Trombly, CEO of Sonoma Pharmaceuticals. She continued, “As disinfectant and sanitizer use has increased due to the pandemic that has spread around the world, we are excited to work with our partners, like MicroSafe Group, to make a positive difference by providing safer environments for people during this difficult time. As an

international company selling products in 53 countries around the world, we are continuously seeking additional partners to expand our domestic and global reach in distributing our products.”

About Sonoma Pharmaceuticals, Inc.

Sonoma Pharmaceuticals is a global healthcare leader for developing and producing stabilized hypochlorous acid (HOCl) products for a wide range of applications, including wound care, animal health care, eye care, nasal care, oral care and dermatological conditions. The company’s products reduce infections, itch, pain, scarring and harmful inflammatory responses in a safe and effective manner. In-vitro and clinical studies of hypochlorous acid (HOCl) show it to have impressive antipruritic, antimicrobial, antiviral and anti-inflammatory properties. Sonoma’s stabilized HOCl immediately relieves itch and pain, kills pathogens and breaks down biofilm, does not sting or irritate skin and oxygenates the cells in the area treated assisting the body in its natural healing process. The company’s products are sold either directly or via partners in 53 countries worldwide and the company actively seeks new distribution partners. The company’s principal office is in Woodstock, Georgia, with manufacturing operations in Latin America. European marketing and sales are headquartered in Roermond, Netherlands.
