## **Sonoma Pharmaceuticals Announces Partnership with Gabriel Science, LLC For Dental Markets**

WOODSTOCK, Ga.--(BUSINESS WIRE)-- Sonoma Pharmaceuticals, Inc. (Nasdaq: SNOA), a global healthcare leader developing and producing stabilized hypochlorous acid (HOCl) products for a wide range of applications, including wound, eye, oral and nasal care, disinfectant use and dermatological conditions, today announced that it has entered into a non-exclusive distribution agreement with Gabriel Science, LLC for the sale of Microcyn® Technology products into the dental market and has accepted its first order.

Endocyn®, a Microcyn® Technology product manufactured by Sonoma, is a biocompatible root canal irrigant that does not stain teeth or restorations. In a study conducted by the Departments of Endodontics and Cell Biology and Anatomy at Louisiana State University School of Dentistry published in the Journal of Endodontics, Regenerative Endodontics, Endocyn demonstrated less cellular toxicity compared to traditional endodontic irrigants such as sodium hypochlorite. The full study can be found here:

“We believe Endocyn and the Microcyn family of hypochlorous acid products are the next generation of products to help in the management of a myriad of dental, head and neck conditions” said Dr. Mark Fontenot, managing member at Gabriel Science, LLC. “The Microcyn family of HOCl products is a much needed addition to the treatment options available to dental healthcare providers given Microcyn’s superior performance.”

“We are pleased to bring this cutting-edge advance in dental products to the U.S. market and to partner with Gabriel Science,” said Amy Trombly, CEO of Sonoma Pharmaceuticals. “Our proprietary Microcyn technology is truly the next-generation formulation in terms of superior antimicrobial impact, shelf stability and safety. This partnership also furthers Sonoma’s strategy of expanding its offerings of Microcyn-powered products available in the U.S. market.”

### **About Gabriel Science, LLC**

Gabriel Science, LLC is a life science company dedicated to providing advanced therapies and products for the professional management of oral, dental, maxillofacial, and head and neck conditions. In collaboration with leading clinicians, Gabriel Science distributes and sells proprietary products for tissue regeneration, wound healing, and head and neck disease management. ### **About Sonoma Pharmaceuticals, Inc.**

Sonoma Pharmaceuticals is a global healthcare leader for developing and producing stabilized hypochlorous acid (HOCl) products for a wide range of applications, including wound care, animal health care, eye care, nasal care, oral care and dermatological conditions. The company's products reduce infections, itch, pain, scarring and harmful inflammatory responses in a safe and effective manner. In-vitro and clinical studies of hypochlorous acid (HOCl) show it to have impressive antipruritic, antimicrobial, antiviral and anti-inflammatory properties. Sonoma's stabilized HOCl immediately relieves itch and pain, kills pathogens and breaks down biofilm, does not sting or irritate skin and oxygenates the cells in the area treated assisting the body in its natural healing process. The company's products are sold either directly or via partners in 53 countries worldwide and the company actively seeks new distribution partners. The company's principal office is in Woodstock, Georgia, with manufacturing operations in Latin America. European marketing and sales are headquartered in Roermond, Netherlands.
