

COMPANY OVERVIEW

BioCorRx Inc. is an addiction treatment company offering a unique approach to the treatment of substance abuse addiction. The BioCorRx[®] Recovery Program, a non-addictive, medication-assisted treatment (MAT) program, consists of two main components. The first component of the program consists of an outpatient implant procedure performed by a licensed physician. The implant delivers the non-addictive medicine, naltrexone, an opioid antagonist that can significantly reduce physical cravings for alcohol and opioids. The second component of the program developed by BioCorRx Inc. is a one-on-one proprietary counseling program specifically tailored for the treatment of alcoholism and other substance abuse addictions for those receiving long-term naltrexone treatment. Additionally, we have expanded the support structure to include 12 months of a peer-support system utilizing trained recovery specialists. The company is also developing a patent pending injectable form of naltrexone.
