Annamarie Gayle, CODA's CEO commented: "I am pleased to present another set of strong results to our stockholders and to the market. I also wish to underline that the Group's performance during the past quarter would have been even stronger, had the UK portion of our business not been adversely affected by the depreciation of the pound against the US dollar since the June 23rd UK referendum vote to leave the European Union. Approximately 45% of our revenues and associated costs are denominated in pounds and this has affected both our Income Statement and Balance Sheet."

"We expect to be able to continue to report good financial progress to the market over the coming periods, which will be underpinned by our continued development of our industry-leading 3D real-time sonar product set. We expect to launch several new offerings, reflecting key technological advancements, during the coming year. Our engineering service business, which primarily serves the US and UK defense industries, is expecting another strong year."
