## **Car Charging Group CEO Featured on Fox News**

### **Michael D. Farkas Explains Electric Car Charging Technology on National News Channel**

MIAMI BEACH, Fla., Dec. 1, 2010 (GLOBE NEWSWIRE) -- Michael D. Farkas, Chief Executive Officer of Car Charging Group Inc., (OTCBB:CCGI), an owner and provider of electric vehicle (EV) charging stations, is appearing in a taped news segment running throughout the day on Fox News Channel, the national cable and satellite television news channel that broadcasts to over 102 million households in the United States.

The broadcast segment, titled "Utilities Scramble To Install Electric Car-Charging Stations," was hosted by Fox News Channel's correspondent Phil Keating who spoke to Michael about the electric vehicle charging infrastructure.

With more than 20 electric vehicle models, including the Chevrolet Volt, made by GM, and the Nissan LEAF, hitting the U.S. market over the next three years and \$5 billion in government-backed investments for battery technology and consumer incentives, the U.S. EV market is poised for tremendous growth and widespread adoption. However, as the Fox segment notes, the transportation infrastructure must be updated to provide easy access to energy everywhere drivers live and work.

By investing at the forefront of the electric car revolution, Car Charging Group seeks to become the leading provider of electric car charging services. Farkas discussed on-air the business opportunity inherent in the entire process, "I see it today as being one of the biggest growth industries... you're changing the entire propulsion system of the transportation system."

*About Car Charging Group, Inc.*

Car Charging Group, Inc. is an owner and provider of electric vehicle (EV) charging stations with the mission to build-out a nationwide infrastructure, enabling EV and PHEV owners to charge their EVs anytime, anywhere. As part of its strategy, the Company owns, provides, installs and maintains electric vehicle charging units and works with various landowner partners to identify appropriate locations for its charging stations. The Company seeks to provide convenient, safe and affordable charging stations away from home in customer-friendly public locations, including municipalities, shopping malls and parking garages.

An estimated 40 million plug-in electric vehicles are predicted to be on the road by the year 2030. This estimate includes models from auto industry leaders, such as the Nissan Leaf, the GM Chevy Volt, the Fisker Karma, and the Tesla Model S. Car Charging Group, Inc. and other companies in the EV industry such as ECotality, Better Place, Eaton Corporation, and now GE realize the need to establish charging networks throughout the transportation infrastructure to provide easy access to charging stations everywhere drivers live and work.

By investing at the forefront of the electric car revolution, Car Charging Group, Inc. seeks to become the leading provider of electric car charging services. The Company launched its operations nationally in September of 2009 and is expanding its operations internationally.

Car Charging Group, Inc. is based in Miami, Florida. The Company's website can be viewed at [www.carcharging.com](http://www.carcharging.com).
