Sonim Technologies and Materna Information & Communications / Vistream Power World's First Standards-Based IP based Push-To-Talk Services in Germany

Open Mobile Alliance Push-To-Talk-Over -Cellular (OMA PoC) is Alive and Kicking with launch of first end-to-end PTT services over IMS

SAN MATEO, Calif. & DORTMUND, Germany--(BUSINESS WIRE)--

Sonim Technologies, the leader in Push-To-Talk IMS solutions for operators and the global provider of high-performance mobile VoIP applications and devices, today announced that Materna Information & Communications, a leading telecommunication company, and Materna's daughter company Vistream, a leading edge Mobile Virtual Network Enabler (MVNE) in Germany, has selected Sonim's end-to-end solution to launch the first standard's based Push-To-Talk system. Effective in mid 2007, Vistream's branded and value-added reseller customers will have access to Sonim's XP1 mobile "tough phones" as Walkie-Talkies and can access a high performance Push-to-Talk service.

Sonim hopes to help wireless operators around the world replicate Nextel's success in the United States by bringing a comprehensive, OMA standards-based Push-To-Talk system to operators and enterprises in Germany and Europe. This open approach to integrated mobile VoIP services utilizing IMS is being embraced by companies and operators across Europe, most notably by Materna / Vistream, KPN, Telefonica Moviles and Selectric and Dialect, large value-added resellers in Germany and Sweden.

"With Sonim's XP1 handset and robust Push-To-Talk service, we anticipate a strong launch, offering businesses an affordable group communications system that supports a uniform standard across different mobile telephones. From Materna / Vistream's point of view, Sonim is the ideal partner when it comes to supplying these services to our customers," explains Helmut an de Meulen, CEO and co-founder of Materna Information & Communications. "Sonim offers a unique combination of Push-To-Talk applications and equipment, which enables us to offer the best and most comprehensive communications solution that is currently available on the market."

"We're breaking ground for OMA Push-To-Talk in Europe and we're proud to have been an early and aggressive driver of standards-based IMS services to get us where we are today," said Thomas Hornung, Board Member of Sonim Technologies. "We're delighted to experience such momentum in Europe with respected MVNOs / MVNEs like Materna / Vistream and operators like KPN and Telefonica Moviles. Sonim is in a unique position to

create a unique value in Europe that Nextel captured in the United States and we're aggressively acting on this strategy."

About Sonim Technologies Inc.
