# Intensity Therapeutics Selected for Spotlight Oral Presentation at the 2023 San Antonio Breast Cancer Symposium

WESTPORT, Conn., Dec. 1, 2023 /PRNewswire/ -- [Intensity Therapeutics, Inc.](https://www.intensitytherapeutics.com) (Nasdaq: INTS), a clinical-stage biotechnology company focused on the discovery and development of proprietary, novel immune-based intratumoral cancer therapies designed to kill tumors and increase immune system recognition of cancers, today announced that it has been selected for a spotlight oral presentation at the 2023 San Antonio Breast Cancer Symposium (SABCS) on December 8, 2023. Dr. Angel Arnaout will be conducting the oral presentation which will highlight the efficacy and immunomodulatory effects of INT230-6 in early-stage breast cancer.

## Spotlight Oral Presentation Details

### Concurrent Poster Spotlight Session Block #6

PS16 Enhancing Immunotherapy for Triple Negative Breast Cancer: Novel Therapies and Biomarkers

**Moderator:** Hope S. Rugo, MD, FASCO, University of California San Francisco Helen Diller Family Comprehensive Cancer Center, San Francisco, California

**Title:** Intra-tumoral dosing of INT230-6 in early-stage breast cancer patients induces tumor cell necrosis and immunomodulatory effects: A phase II randomized window-of-opportunity study – the INVINCIBLE trial

**Presentation #:** PS16-03

**Date and Time:** Friday, December 8, 7:00 – 8:00 a.m. CT

**Location:** Stars at Night Ballroom 3 & 4

**Presenter:** Angel Arnaout, M.D., MSc, Ottawa Hospital Research Institute, Ontario Institute of Cancer Research

**Discussant:** Sangeetha Reddy, M.D., M.S.C.I., UT Southwestern Medical Center, Dallas, Texas

### About Intensity Therapeutics

Intensity Therapeutics, Inc. is a clinical-stage biotechnology company pioneering a new immune-based approach to treat solid tumor cancers. Intensity leverages its DfuseRx<sup>SM</sup> technology platform to create proprietary drug formulations that following direct injection rapidly disperse throughout a tumor and diffuse therapeutic agents into cancer cells.

Intensity's product candidates have the potential to induce an adaptive immune response that not only attacks the injected tumor, but also non-injected tumors. The Company's lead product candidate, INT230-6, is in development for the treatment of patients with solid tumors, such as sarcoma and breast cancer. Intensity has a clinical collaboration agreement with Merck Sharpe & Dohme (Merck) to evaluate INT230-6 with pembrolizumab. In addition, the Company has a clinical collaboration agreement with Bristol-Myers Squibb to evaluate the combination INT230-6 with Bristol-Myers Squibb's anti-CTLA-4 antibody, ipilimumab. Intensity has also executed agreements with the Ottawa Hospital Research Institute (OHRI) and the Ontario Institute of Cancer Research (OICR) to study INT230-6 in a randomized controlled neoadjuvant phase 2 study in women with early stage breast cancer (the INVINCIBLE study) ([NCT04781725](https://clinicaltrials.gov/ct2/show/study/NCT04781725)). Additionally, the Company executed a Cooperative Research and Development Agreement (CRADA) with the National Cancer Institute's (NCI) Vaccine Branch.
