Propanc Biopharma to Present at the 2019 BIO CEO & Investor Conference

Oncology Pioneer to Present Update on Novel Cancer Treatment; Presentation Scheduled for Tuesday, February 12th at 9:45 am EST

MELBOURNE, Australia--(BUSINESS WIRE)-- [Propanc Biopharma, Inc.](http://www.propanc.com) (OTCQB: PPCB) ("Propanc"), a clinical stage biopharmaceutical company focused on development of new and proprietary treatments for cancer patients suffering from solid tumors such as pancreatic, ovarian and colorectal cancers, today announced that its Chief Executive Officer, James Nathanielsz, will be presenting at the 2019 BIO CEO & Investor Conference on Tuesday, February 12, 2019, at 9:45 am EST. The conference will be held at the New York Marriott Marquis.

"The BIO CEO & Investor Conference is one of the largest investor conferences, focused on established and emerging publicly traded and select private biotech companies, and I am honored to be selected to present at this year's conference. As we prepare to transition our lead technology into human trials, this is a great opportunity for us to meet with investors and potential partners to provide a company update for 2019, focusing on the advancement of our lead product, PRP," said James Nathanielsz, CEO and Executive Chairman of Propanc. "PRP is a solution for intravenous administration of a combination of two pancreatic proenzymes trypsinogen and chymotrypsinogen. Progressing towards a first-in-human study, PRP seeks to prevent recurrence and metastasis from solid tumors by targeting and eradicating cancer stem cells."

Investors and potential partners attending the conference who wish to meet with Propanc's management can reach out through the BIO One-on-One Partnering system to request a meeting. For those not planning to attend the meeting, please contact Lisa DeScenza to set up a call with Mr. Nathanielsz to learn more about Propanc.

A live audio webcast of Mr. Nathanielsz's presentation will be accessible within the Investor Relations section of Propanc's website at <https://ir.propanc.com/presentations>. An archived version of this webcast will be available for 90 days following the conclusion of the live presentation.

About Propanc Biopharma, Inc.

Propanc Biopharma, Inc. (the "Company") is a biopharmaceutical company developing new cancer treatments initially for patients suffering from pancreatic, ovarian and colorectal cancers. The Company has developed a formulation of anti-cancer compounds, which exert a number of effects designed to control or prevent tumors from recurring and spreading throughout the body by targeting and eradicating cancer stem cells. The Company's products involve or employ pancreatic proenzymes, which are inactive precursors of enzymes. In the near term, the Company intends to target patients with limited remaining therapeutic options for the treatment of solid tumors. In the future, the Company intends to develop its lead product candidate, PRP, to treat early stage cancer and pre-cancerous diseases, and as a preventative measure for patients at risk of developing cancer based on genetic screening.

PRP is a solution for intravenous administration of a combination of two pancreatic proenzymes trypsinogen and chymotrypsinogen. Progressing towards a first-in-human study, PRP seeks to prevent recurrence and metastasis from solid tumors by targeting and eradicating cancer stem cells. Eighty percent of cancers are solid tumors and metastasis is the main cause of patient death from cancer. According to the World Health Organization, 8.2 million people died from cancer in 2012. A report by IMS Health states innovative therapies are driving the global oncology market to meet demand, which is expected to reach \$150 billion by 2020. The Company's initial target patient populations are pancreatic, ovarian and colorectal cancers, representing an estimated combined market segment of \$14 billion in 2020, according to GBI Research.
