Ondas Networks and Siemens Mobility to Jointly Participate at Annual Railway System Supplier Show in Kansas City

WALTHAM, MA / ACCESSWIRE / May 17, 2022 /[Ondas Holdings Inc.](#) (NASDAQ:ONDS) ("Ondas" or the "Company"), a leading provider of private wireless, drone and automated data solutions through its wholly owned subsidiaries, Ondas Networks Inc. ("Ondas Networks") and American Robotics, Inc. ("American Robotics" or "AR"), announced today that Ondas Networks and Siemens Mobility will be jointly exhibiting today and Wednesday the Siemens branded Airlink product line at this year's 61st Annual Railway System Supplier Show in Kansas City, Missouri.

Products to be showcased include the jointly developed ATCS radio platform, along with Siemens branded Airlink products based on Ondas Networks' MC-IoT FullMAX platform. The companies will demonstrate simultaneous operation of the legacy ATCS analog protocol and MC-IoT connectivity in the greenfield 900 MHz band. This capacity is viewed as a key feature as the rails transition from the legacy 900 MHz frequencies to the new band for multi-purpose, multi-application IP-based networks.

"We look forward to meeting with key decision makers from the railroads as we advance deployments in the 900 MHz greenfield spectrum and further coordinate roll out plans," stated Eric Brock, Ondas' Chairman and CEO. "We also expect to engage with a broad number of rail technology providers as we work to expand the MC-IoT ecosystem."

Additionally on display in the Siemens booth will be the new Head-of-Train (HOT) radio technology jointly developed by Siemens and Ondas Networks. The two companies continue to make significant progress on this new development program with sales expected to commence in the second half of the year.

About Ondas Holdings Inc.

Ondas Holdings Inc. ("Ondas") is a leading provider of private wireless data and drone solutions through its wholly owned subsidiaries Ondas Networks Inc. ("Ondas Networks") and American Robotics, Inc. ("American Robotics" or "AR"). Ondas Networks is a developer of proprietary, software-based wireless broadband technology for large established and emerging industrial markets. Ondas Networks' standards-based (802.16s), multi-patented, software-defined radio FullMAX platform enables Mission-Critical IoT (MC-IoT) applications by overcoming the bandwidth limitations of today's legacy private licensed wireless networks. Ondas Networks' customer end markets include railroads, utilities, oil and gas, transportation, aviation (including drone operators) and government entities whose demands span a wide range of mission critical applications. American Robotics designs, develops, and markets industrial drone solutions for rugged, real-world environments. AR's Scout System™ is a highly automated, AI-powered drone system capable of continuous, remote operation and is marketed as a "drone-in-a-box" turnkey data solution service under a Robot-as-a-Service (RAAS) business model. The Scout System™ is the first drone system

approved by the FAA for automated operation beyond-visual-line-of-sight (BVLOS) without a human operator on-site. Ondas Networks and American Robotics together provide users in rail, agriculture, utilities and critical infrastructure markets with improved connectivity and data collection capabilities.
