- ***Q1 Fiscal 2020 Financial Results Webcast to be Held August 8, 2019, at 1:45 PM PT, 4:45 PM ET***

VAN NUYS, CA / ACCESSWIRE / July 8, 2019 /Capstone Turbine Corporation (www.capstoneturbine.com) (NASDAQ: CPST), the world's leading clean technology manufacturer of microturbine energy systems is announcing select preliminary financial results for its fiscal first quarter ended June 30, 2019 as part of its ongoing effort of continuing transparency.

Select Preliminary Financial Highlights of Fiscal 2020 First Quarter:

- Book-to-bill ratio of 1.7:1 for Q1 fiscal 2020 compared with 1.4:1 for Q4 and 1.3:1 in Q3 fiscal 2019.
- New gross product bookings were \$17.4 million during the quarter, representing a 9% increase year-over-year.
- The company allocated a 1.0 MW production slot to growing its long-term rental fleet and a 0.6 MW production slot to a biogas-to-energy customer demonstration project in Asia as total revenue year-over-year for the quarter decreased by approximately 9% to \$19.2 million from \$21.2 million.
- Revenue from accessories, parts and service increased \$1.5 million, or 20%, to \$9.1 million from \$7.6 million for the first quarter of fiscal 2019.
- Total cash and cash equivalents as of June 30, 2019, are estimated to be \$24.6 million, compared to \$29.7 million as of March 31, 2019.

Capstone booked new gross product orders of approximately \$17.4 million during the first quarter of fiscal 2020, for a 1.7:1 book-to-bill ratio, representing a 9% increase in new gross product bookings year-over-year.

"New product order momentum continued to improve throughout the first quarter as we exited with a strong 1.7:1 book-to-bill ratio compared with 1.4:1 and 1.3:1 in the prior two quarters," stated Darren Jamison, President and Chief Executive Officer of Capstone. "I believe these recent positive quarterly book-to-bill results reflect the initial success of our new growth initiative implemented recently and detailed in our last quarterly report," added Mr. Jamison.

Capstone's preliminary results show total revenue for the first quarter of fiscal 2020

decreased to \$19.2 million, from \$21.2 million in the same period last year. Capstone's product revenue decreased approximately \$3.5 million during the first quarter of fiscal 2020 to approximately \$10.1 million compared to \$13.6 million in the same period last year in part because the company allocated 1.6 MWs of product production slots to growing its long-term rental fleet and to a biogas-to-energy demonstration project in Asia.

During the quarter the company signed two new long-term rental contracts totaling 2.6 MWs with 1.0 MW being deployed during the first quarter of fiscal 2020 and 1.6 MWs to be deployed in the upcoming quarter. This latest long-term rental deployment brings the total rental fleet up to 4.6 MWs and with an additional 1.6 MWs expected to be deployed in September bringing the estimated long-term microturbine rental fleet up to 6.2 MWs versus a management stated goal of 10.0 MWs.

Revenue from accessories, parts and service increased \$1.5 million, or 20%, year-over-year to \$9.1 million from \$7.6 million for the first quarter of fiscal 2019. Expanding Capstone's aftermarket business, which includes the newly expanded long-term rental program, is an important element for the company achieving its near-term profitability goal. This is illustrated by the fact that 98% of Capstone's fiscal 2019 gross margin came from the aftermarket business, which was only 38% of Capstone's fiscal 2019 revenue.

"The expansion of our long-term rental fleet from our initial start of 3.6 MWs last fall, to a total of 6.2 MWs in September, puts us well on our way to reaching our strategic goal of 10.0 MWs," said Jeff Foster, Capstone's Senior Vice President of Customer Service and Product Development. "Long-term rentals are a critical part of growing our aftermarket business and reaching our 100% expense absorption plan and are expected to help us achieve our near-term profitability goals," added Mr. Foster.

Total cash and cash equivalents as of June 30, 2019, were approximately \$24.6 million, compared to cash and cash equivalents of \$29.7 million as of March 31, 2019.

"We finished the first quarter with a solid cash position and utilized our strengthened balance sheet to continue to expand our rental program with the deployment of 1.0 MW in June, and planned deployments of 1.6 MWs for September," said Jayme Brooks, Executive Vice President and Chief Financial Officer of Capstone.

"We continue to execute on our near-term profitability plan that we outlined last year and will be sharpening our focus on top-line revenue growth over the coming quarters. We will continue to experience some short-term revenue volatility as we allocate a portion of our production slots to growing our long-term rental fleet. However, I believe this will generate superior returns over the longer term and further diversify our revenue streams. Additionally, I believe our strong book-to-bill results the last three quarters and our expanding aftermarket service business is giving us a strong point of momentum for the balance of the year and beyond," concluded Mr. Jamison.

The select financial results presented in this press release are preliminary and may change. This preliminary financial information includes calculations or figures that have been prepared internally by management and have not been reviewed or audited by our independent registered public accounting firm.
