**Third Quarter Results:** Net investment income for the quarters ended December 31, 2017 and September 30, 2017 was \$7.5 million, or \$0.23 per common share, and \$5.8 million, or \$0.18 per common share, respectively. Net investment income increased period over period, as the increase in total investment income resulting from higher interest and other income, more than offset the increase in total expenses, net of credits, which was primarily due to higher incentive fees, including \$0.8 million of accrued capital gains-based incentive fees, the payment of which is not contractually due under the investment advisory agreement, in the current period.

Net asset value per common share as of December 31, 2017 increased to \$10.37 compared to \$10.10 as of September 30, 2017. The quarter over quarter increase was primarily due to improved performance and an increase in comparable multiples used to estimate the fair value of certain portfolio companies, which were partially offset by a decline in performance of certain other portfolio companies.
