Paychex Launches Online Mobile Application For iPad®

Secure, easy-to-use tablet app expands Software as a Service capabilities, offers users access to full suite of online payroll, HR, and benefits products through single account sign-on

ROCHESTER, N.Y.--(BUSINESS WIRE)-- Paychex, Inc., a leading provider of [payroll](#), [human resource](#), and [benefits outsourcing](#) solutions for small- to medium-sized businesses, today announced an expansion of its Software as a Service (SaaS) product offerings for clients with the launch of the [Paychex Online Mobile application](#) for the Apple® iPad®. The free, secure, and easy-to-use app includes a newly unveiled and enhanced landing page and message center. Employers and their employees sign in once to access the full suite of Paychex online payroll, human resources, and benefits products.

"The Paychex Online Mobile app is the latest example of our commitment to investing in the next generation of technology and products, and delivering them to our clients," said Paychex president and CEO Martin Mucci. "America's businesses increasingly want access when, where, and how it works for them. Our tablet app offers that by giving our clients and their employees complete access to every online product they now use on their PC or laptop, not a scaled-down version."

Using the Paychex Online Mobile app for the iPad, Paychex Online clients have full access to products including online payroll, online reports, Paychex Time and Labor Online, 401(k), and health insurance. Additionally, the iPad app gives employees of Paychex clients the unique ability to access and make changes to their 401(k) and flexible spending account (FSA) information from an iPad, along with access to products such as W-2s and pay stubs.

Use of the Paychex Online Mobile app requires a Paychex Online Single Sign-on account. Once registered, the same single user name and password used to gain access on a laptop or PC is also used for tablet access. There's no additional setup or different login. Employers don't have to use the tablet app for their employees to use it. If the employer has a single sign-on account, an employee can gain access to the tablet app with a user name and password provided by the client's administrator.

With the launch of the tablet app, Paychex also unveiled a newly expanded landing page and message center that users see when they sign in. This landing page, or dashboard, has a new, consolidated message center that puts all the immediate information about the products a user has in one place. And, it provides the full features and functionality of Paychex Online Services.

"With our iPad app, Paychex clients and their employees can do anything that they now do over the Web on a PC or laptop. They have the same full administrative rights. For instance, clients can input and process payroll. And not only can employees see their 401(k) balance,

they can also go in and make adjustments to their 401(k)," said Michael E. Gioja, Paychex senior vice president of information technology, product management and development. "We brought the tools our clients need to the surface in our dashboard and presented them in a way that lets users get in and out quickly – anytime, anywhere. That means they can get back to their business faster, which helps boost productivity."

Another key feature of the expanded landing page is a "Report Favorites" section, which a user can customize based on what products they use most. This function will benefit clients with more than one business and members of the accounting profession who serve multiple clients. CPAs can flag, see, and easily switch between reports for all of their clients right from their "Report Favorites." The accounting community has a longtime strategic relationship with Paychex, which is the preferred provider of payroll and retirement plan services for AICPA Trusted Business AdvisorSM Solutions.

Paychex Client Perspective

The office manager for a long-time Paychex client said she is looking forward to the ease and convenience of transmitting payroll on the go with the new Paychex iPad app. Amie Fox is with Mike Lauterborn Enterprises, a commercial and residential electrical contracting business in Rochester, N.Y. Fox said the company has used Paychex Online Services since 2006, providing desktop and laptop access, but she looks forward to the new, additional mobility.

"With the new Paychex Online Mobile iPad app, I can use my iPad to run our company's payroll virtually anywhere, on my schedule," Fox added.

Paychex Online Mobile app requirements

To use the Paychex Online Mobile app, clients must have a Paychex Online Services user name, password, and PIN, acquired with creation of a Paychex Online Single Sign-on account. Users also must have a wireless Internet connection and an Apple iPad.

The Paychex Online Mobile app is available to download, at no cost, from the Apple App Store for iPad.

Editor's notes: An image of the Paychex Online Mobile app landing page and a 30-second promotional video are available for download in the Media Kits section of the Paychex newsroom at www.paychex.com.
