UiPath Named a Leader in Autonomous Testing by Independent Research Firm

UiPath Test Cloud recognized among top autonomous testing solutions with highest possible scores in vision, roadmap, and five other criteria

NEW YORK--(BUSINESS WIRE)-- UiPath (NYSE: PATH), a global leader in [agentic automation](#), today announced it has been named a Leader in *The Forrester Wave™: Autonomous Testing Platforms, Q4 2025*, reinforcing the company's position among top vendors in the autonomous testing platforms market. Built on deep automation expertise and leveraging agentic AI and orchestration, UiPath is helping to define the category and empower enterprises to use AI agents to boost productivity throughout the entire testing lifecycle.

UiPath received the highest possible marks in seven criteria, including vision and roadmap for its testing solution, [UiPath Test Cloud](#). According to the evaluation, "UiPath's strategy is anchored in a clear vision of an agent-based platform with self-healing and predictive insights across testing, observability, and release management; its roadmap supports this. UiPath's testing leverages its rich automation partner ecosystem to create its dedicated QA one."

Additionally, the UiPath Test Cloud offering scored the highest possible marks in criteria including automation creation, orchestration, and execution; testing SaaS business enterprise applications; testing AI across different dimensions; test agent use case and orchestrations; and test agent monitoring and management. According to the report, "UiPath is a strong choice for enterprises already invested in its automation ecosystem and for those seeking agent-driven testing for robotic process automation, agents, and applications."

"UiPath is driving innovation in next generation agentic testing, making our offering more proactive and more autonomous while keeping governance, security, and safety at the core. With UiPath Test Cloud, our customers can continue to meet the demands of the modern, digital enterprise that leverages agentic-driven testing for software applications and AI-infused workflows," said Gerd Weishaar, Senior Vice President, Testing Solutions for UiPath.
