/ CORRECTION - Coda Octopus Group, Inc.

NEW YORK, NY -- (MARKET WIRE) -- 03/27/07 -- In the news release, "Coda Octopus Reports FY 2006 Audited Results," issued Monday, March 26, 2007, by Coda Octopus Group, Inc. (PINKSHEETS: CDOC), we are advised by the company that its Comprehensive Loss for 2006 listed on its Income Statement should read (\$7,841,874) rather than (\$12,378,718) as originally issued. Complete corrected text as follows.

Coda Octopus Reports FY 2006 Audited Results

NEW YORK, NY -- March 26, 2007 -- Coda Octopus Group, Inc. (PINKSHEETS: CDOC), world leader in underwater port security technology, headquartered here, today announced audited results for the fiscal year ended October 31, 2006.

With the Company's second US GAAP audit now completed, Coda Octopus will rapidly file appropriate documents with the SEC and with the NASD to obtain a listing on a national exchange.

FY 2006 Year-End Results

For the fiscal year ended October 31, 2006, Coda Octopus Group, Inc. recorded revenues of \$7,291,291. This compares with revenues of \$4,288,416, for the fiscal year ended October 31, 2005. Net loss applicable to common shares was (\$12,096,014), or (\$0.50) per share in FY 2006, as compared to a loss of (\$3,807,055), or (\$0.16) in FY 2005.

Loss from operations was \$6,352,816. Non-cash charges for stock-based compensation totaled \$2,005,052. R&D spending increased to \$3,130,821 in FY 2006, from \$1,044,695 in FY 2005. There was an increase in accounting and other costs related to the Company's efforts to establish itself as a public company in the US totaling \$1,099,216. Cash and non-cash costs of \$1,232,623 in connection with its financings are also included in the Company's loss from operations.

In addition, the Company booked losses totaling \$4,536,844 from preferred stock dividends and other beneficial conversion features, \$4,152,800 of which was a non-cash expense related to the beneficial conversion feature for preferred stock issued; the balance of \$384,044 was preferred stock dividends owed, \$79,650 of which was paid during the year ended October 31, 2006.

During FY 2006, the Company entered the 3D sonar business and enjoyed revenues of \$1,298,433 from sales of its patented Echoscope(TM) -- the first real-time, 3D, under-the-sea sonar product. Seven Echoscopes have been delivered to customers, who include the US Navy and the US Coast Guard. Sales of Coda's traditional marine product offerings grew by 38.5% to \$5,259,172 from \$3,795,914, driven by motion sensor sales, which grew by

296.6% over the year. Sales for FY 2006 were \$7,291,291, compared to \$4,288,416 for the previous year. This represents an increase of 70%. Gross margins for the year were 64.2%, up from 42.5% in FY 2005.

The Company raised a total of \$5,373,728 with two separate groups of investors during FY 2006. \$1,273,728 was raised by issuing an additional 8,641 shares of Series A preferred, and a total of \$4,100,000 was raised by issuing 41,000 shares of Series B stock. Subsequent to year-end, another \$800,000 has been raised by issuing an additional 8,000 shares of Series B stock. Each Series B preferred share is at the option of the holder convertible into 100 common at \$1.00 per share and carries a 8% coupon, payable semi-annually in cash or the Company's common stock, and includes a warrant to purchase one share of common stock at \$1.30 per share, and an additional warrant to purchase one share of common stock at \$1.70 per share. The Series A is also convertible at the option of the holder and carries a 12% coupon payable semi-annually in cash or the Company's common stock.

As of October 31, 2006, total common shares issued and outstanding were 24,301,980. If all preferred shares were converted into common shares, the number of common shares outstanding would total approximately 32.5 million.

Launching the 3D Sonar Business.

During FY 2006 the Company laid the groundwork for leveraging its first-mover advantage in real-time 3D sonar into a large and highly profitable business.

The Company successfully launched The Echoscope(TM) -- both as a stand-alone, patent protected product for private sector markets in Oil and Gas and off-shore construction, and as the primary 3D component of larger and more sophisticated underwater security and inspection systems. The Company expects the first of these systems will be deployed by government authorities in the US and overseas during FY 2007.

In addition, during FY 2006, the Company assembled the necessary resources and, in cooperation with its partners, has begun to market comprehensive security solutions to various port authorities around the world, based upon its unique expertise and patented 3D underwater component. The Company believes the 3D underwater solutions market is well in excess of \$5 billion worldwide. It expects initial contract awards for its comprehensive security solutions during FY 2007, with significant revenue recognition to begin in FY 2008.

After more than 2 1/2 years of close cooperation, during FY 2006 the US Coast Guard R&D Center carried out an extensive review of underwater technology including sonars, and their role in fulfilling the nation's port security requirements. Scott Trip, who is the Project Manager Underwater Systems of the center concluded "...3D sonar raises the bar and sets a new standard for underwater port and harbor security..."

According to Jason Reid, Coda Octopus President and CEO, "In order to capitalize on Coda's first mover status as the patent holder and sole provider of high resolution real time 3D sonar to the underwater security marketplace, during FY 2006 we have grown the company as rapidly as we possibly could in terms of its head count, which grew from 37 to 77; the scope of our product offerings, which we design, manufacture and market worldwide; and perhaps most importantly, in the depth of our consulting/engineering expertise, which we have substantially improved through the acquisition of Martech Systems in June of 2006.

We are planning for a dramatic build in revenues beginning in the third quarter of FY 2007, with profitability soon thereafter."

About Coda Octopus

Founded in 1994 as Coda Technologies, Coda Octopus is recognized internationally as a leading developer of underwater technologies for imaging, mapping, defense and survey applications. Based in New York, with R&D, manufacturing, and sales facilities in the UK, Norway, and Florida, its key products include Octopus precision motion sensors, Coda and Octopus marine software and systems, Octopus thermal printers and the unique Coda Echoscope -- the first real time 3D sub sea sonar with a variety of applications within navies and for sub sea construction. The Echoscope is the heart of the Coda Octopus Underwater Inspection System used for homeland security in ports around the world. With the successful launch of this patented new product, which revolutionizes sub sea visualization, Coda Octopus believes it has established itself as the world leader in underwater port security technology..
