# Oculus Innovative Sciences Announces Fiscal Second Quarter Financial Results and Corporate Update Release and Conference Call

PETALUMA, Calif.--(BUSINESS WIRE)--

Oculus Innovative Sciences, Inc. (Nasdaq: OCLS), a biopharmaceutical company that develops, manufactures and markets a family of products based upon the Microcyn(R) Technology platform, today announced that the financial results for its fiscal second quarter ended September 30, 2008, will be released after the U.S. market closes on November 6, 2008. The earnings release will be followed by a conference call at 1:30 p.m. PT (4:30 p.m. ET) on November 6, 2008, to discuss fiscal second quarter results and provide a corporate update to the investment community.

Individuals interested in participating in the conference call may do so by dialing (800) 232-9476 for domestic callers or (706) 679-2532 for international callers. Those interested in listening to the conference call live via the Internet may do so at <http://ir.oculusis.com/events.cfm>. Please log on approximately 30 minutes prior to the presentation in order to register and download the appropriate software.

A telephone replay will be available for 48 hours following the conclusion of the call by dialing (800) 642-1687 for domestic callers, or (706) 645-9291 for international callers, and entering reservation code 71364247. A webcast replay will be available on the site at <http://ir.oculusis.com/events.cfm> for one year following the call.

## About Oculus

Oculus Innovative Sciences develops, manufactures and markets a family of products based upon the Microcyn(R) Technology platform, which is intended to help prevent and treat infections in chronic and acute wounds. The Microcyn Technology platform features a biocompatible, shelf-stable solution containing active oxychlorine compounds that is currently commercialized primarily in the United States, Europe, India, China and Mexico for the treatment of wounds. The solutions derived from this platform have demonstrated, in a variety of research and investigational studies, the ability to treat a wide range of pathogens, including antibiotic-resistant strains of bacteria (including MRSA and VRE), viruses, fungi and spores. A recent Phase II clinical trial of Microcyn Technology conducted in the U.S. met its primary endpoints of safety and efficacy for the treatment of mildly infected diabetic foot ulcers. The company's headquarters are in Petaluma, California, with operations in Europe and Latin America. More information can be found at [www.oculusis.com](http://www.oculusis.com).
